

Atención

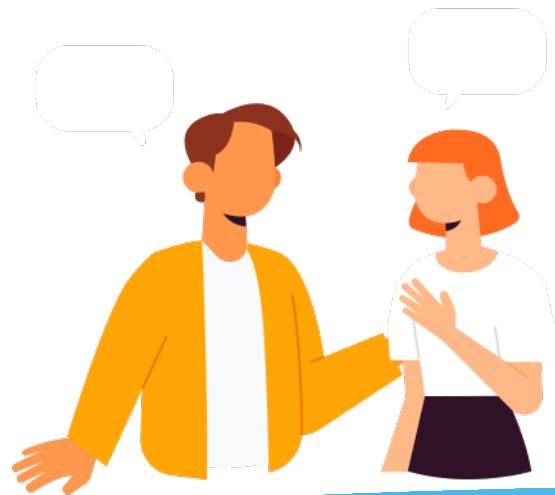

Solo una porción de eventos simultáneos
se puede procesar en conducta

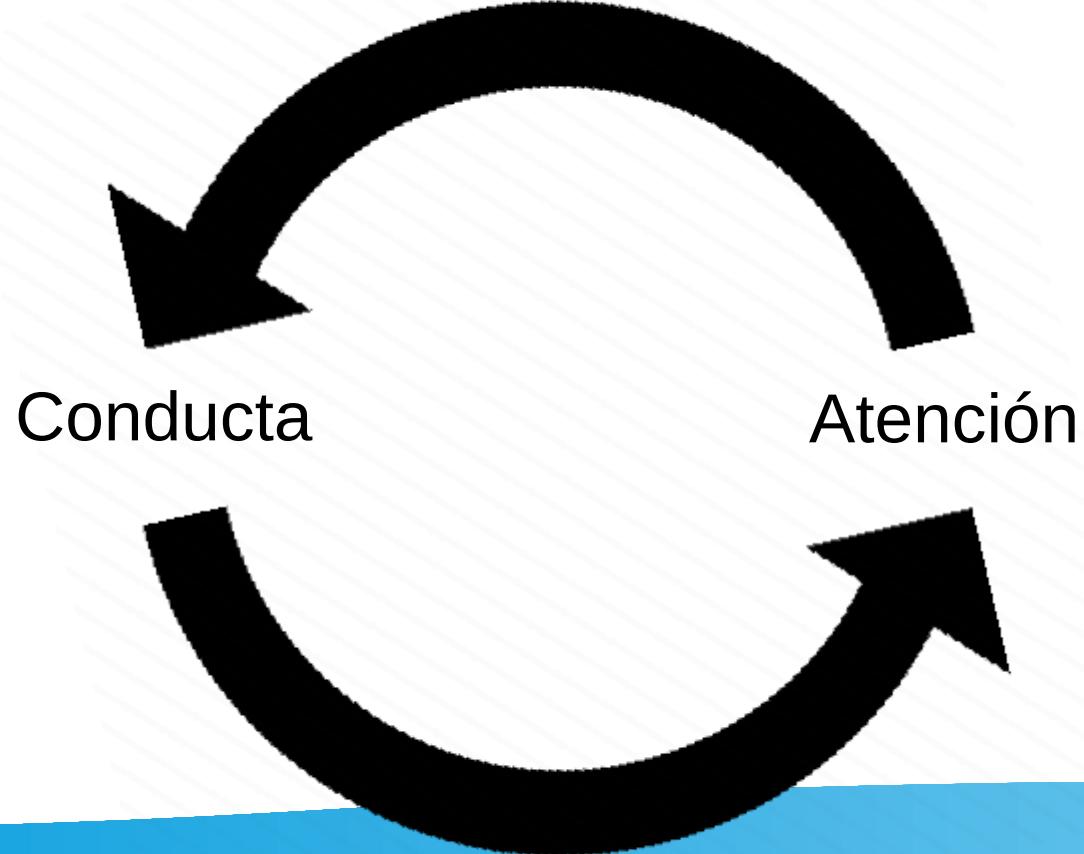

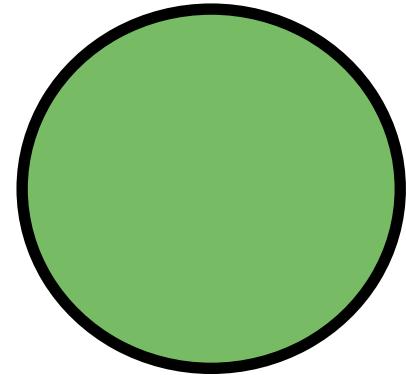

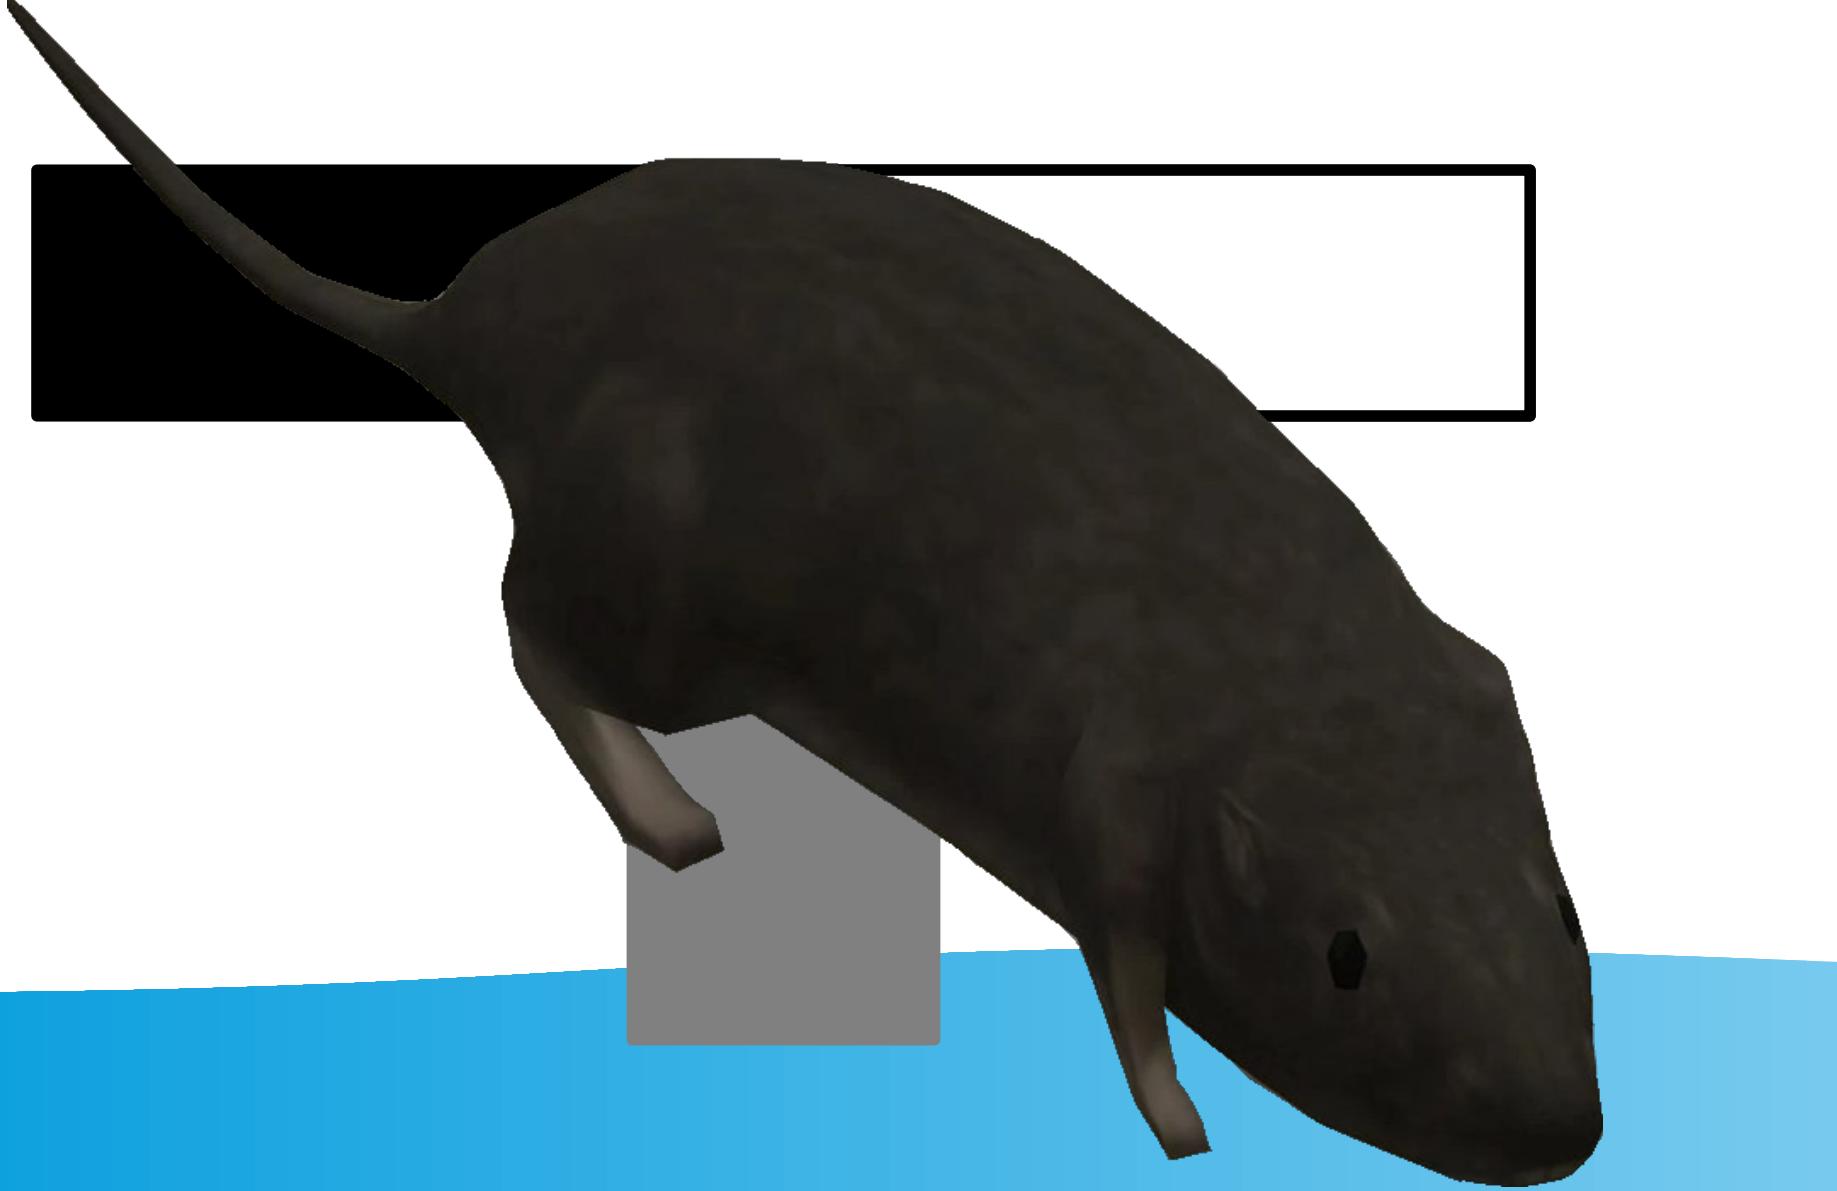

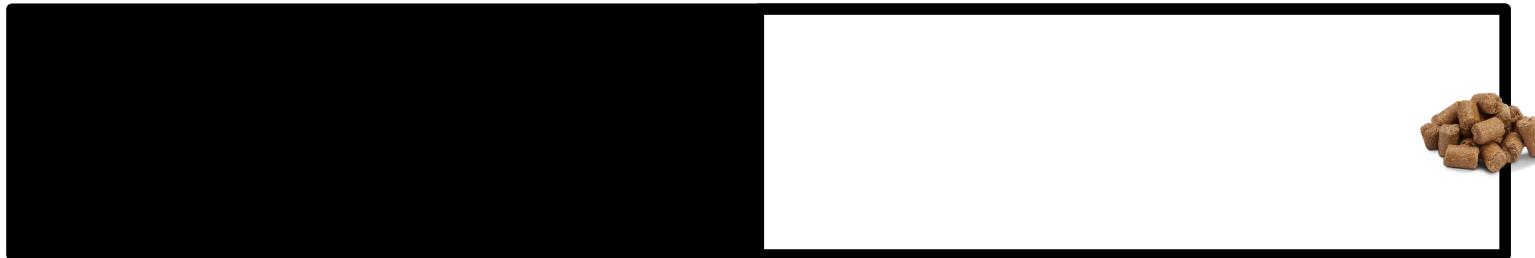

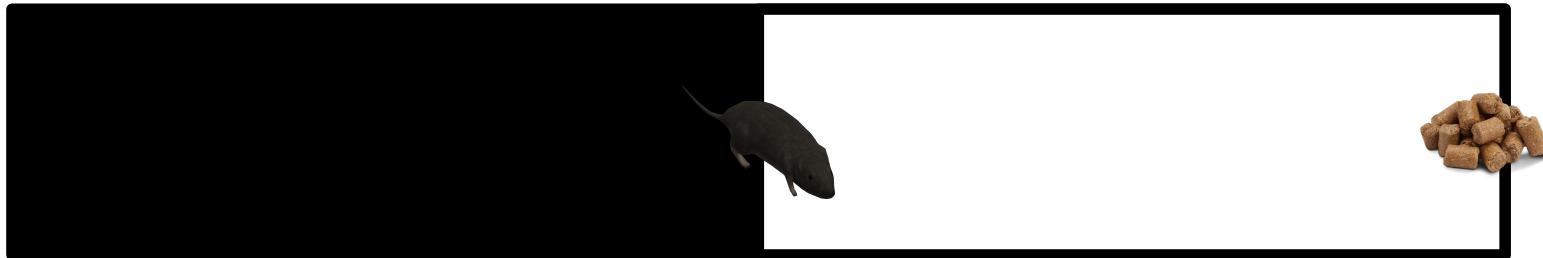

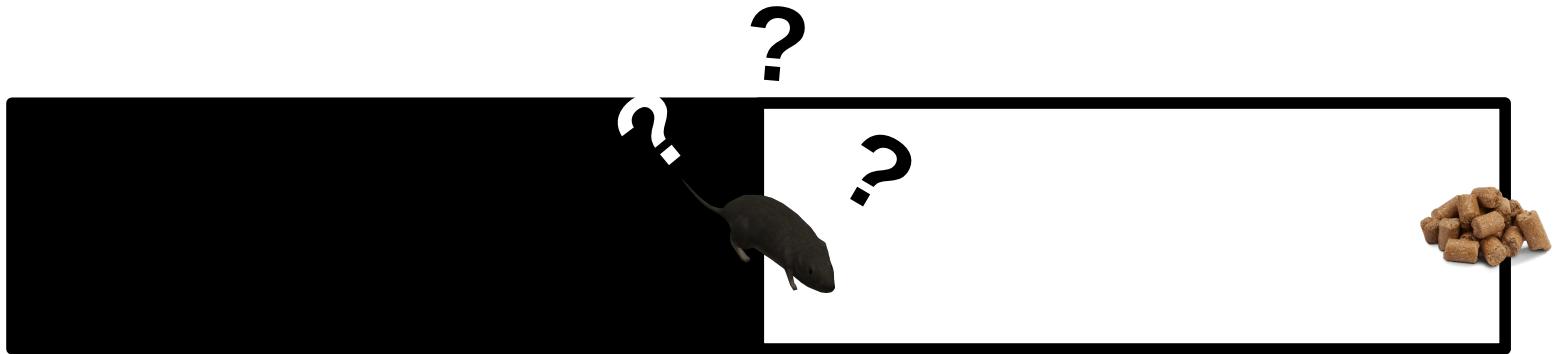

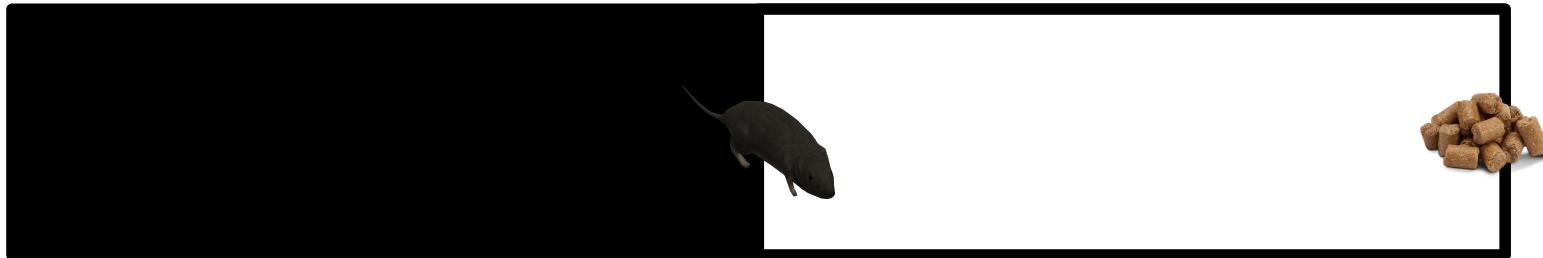

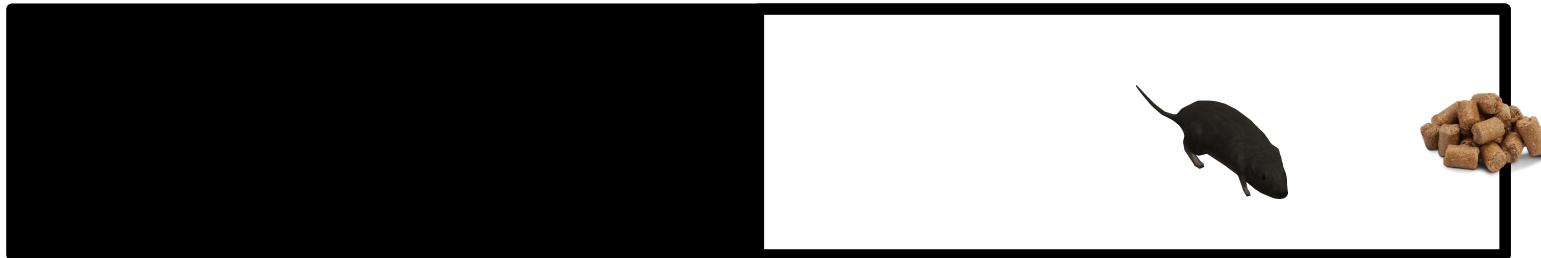

Teoría de continuidad vs teoría de no-continuidad

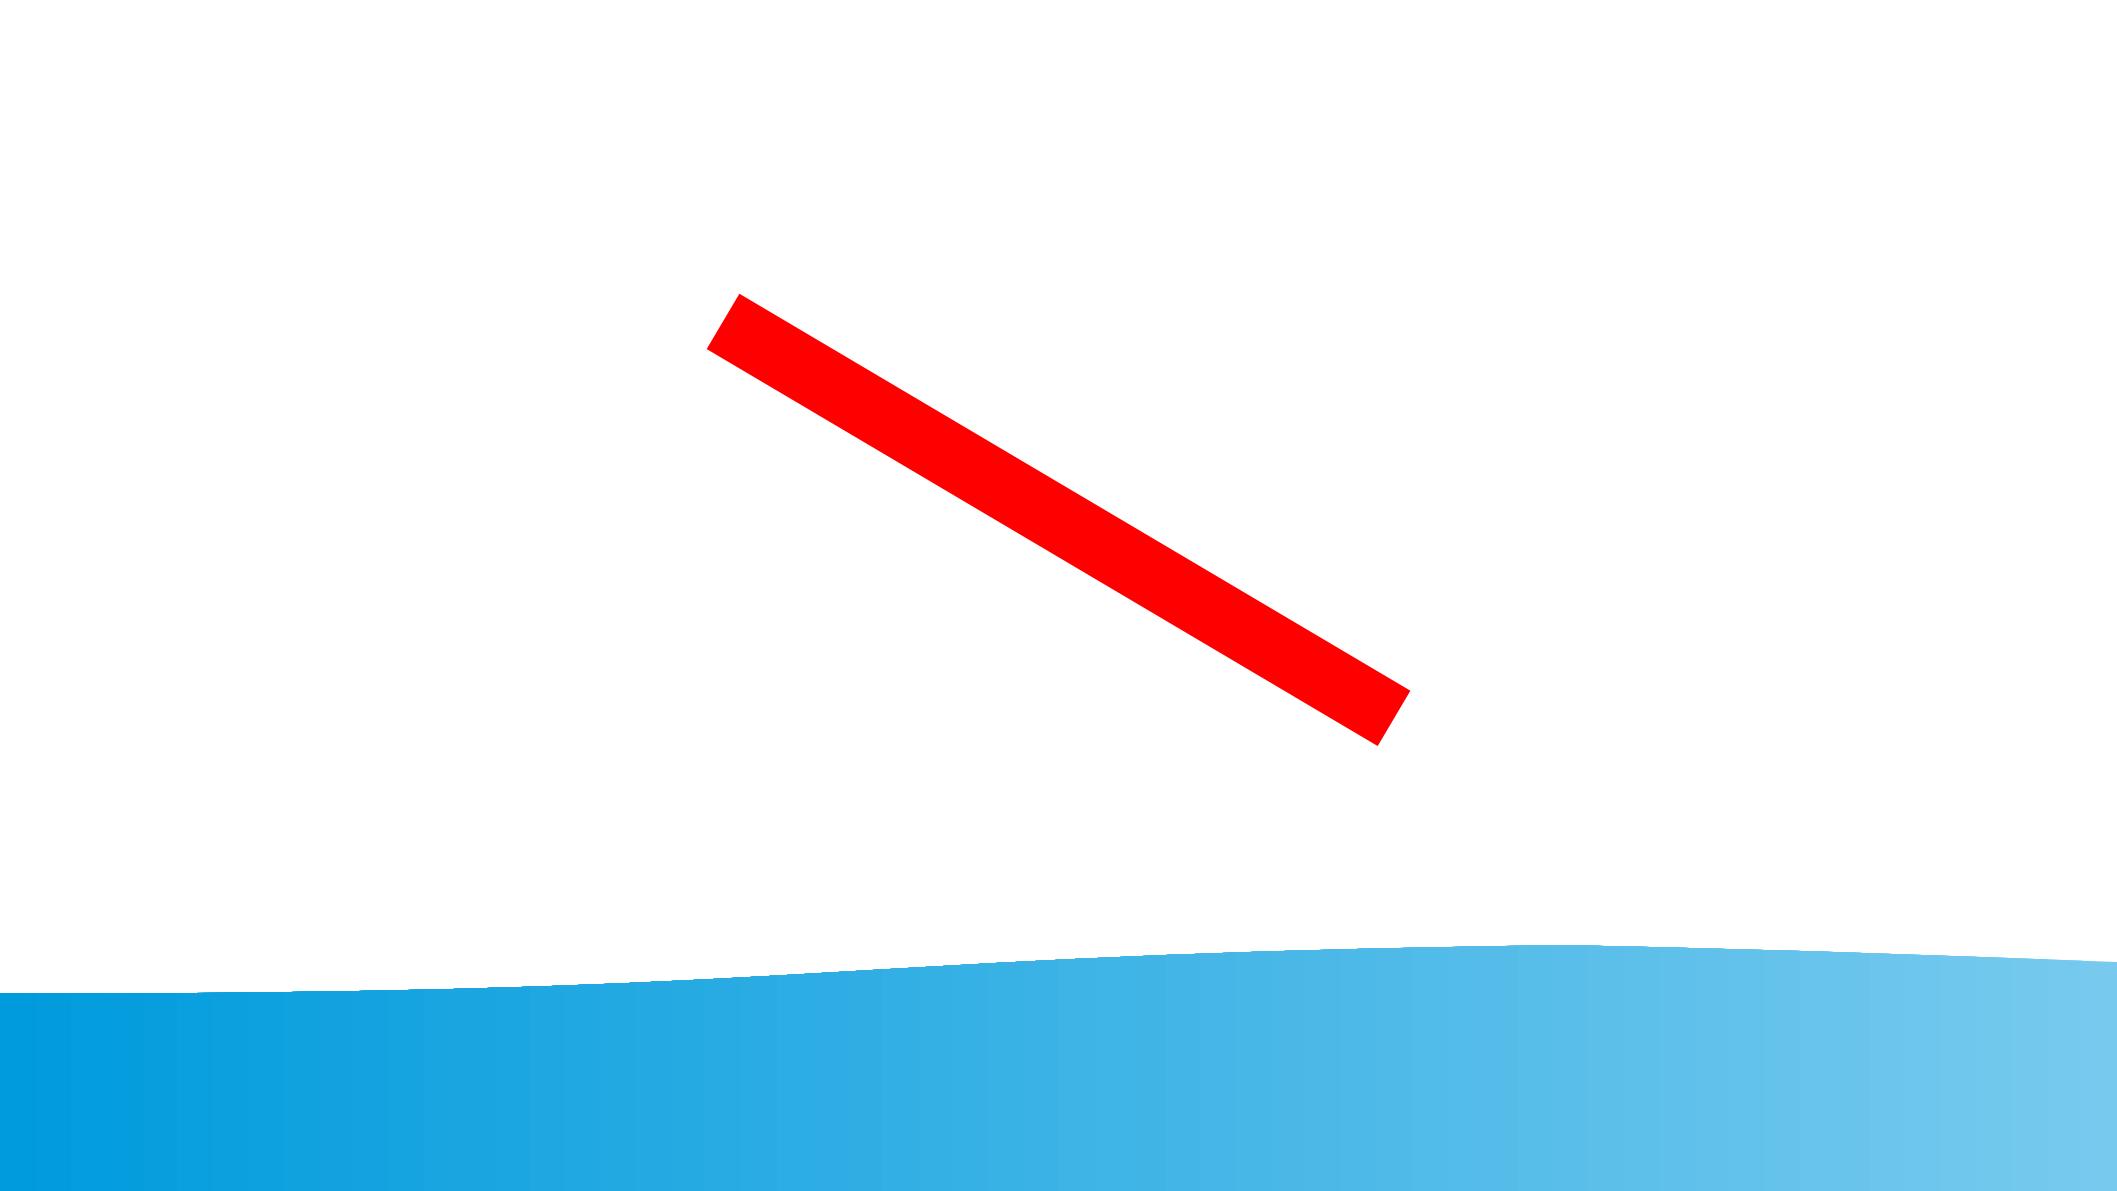

¿De qué color era la línea?

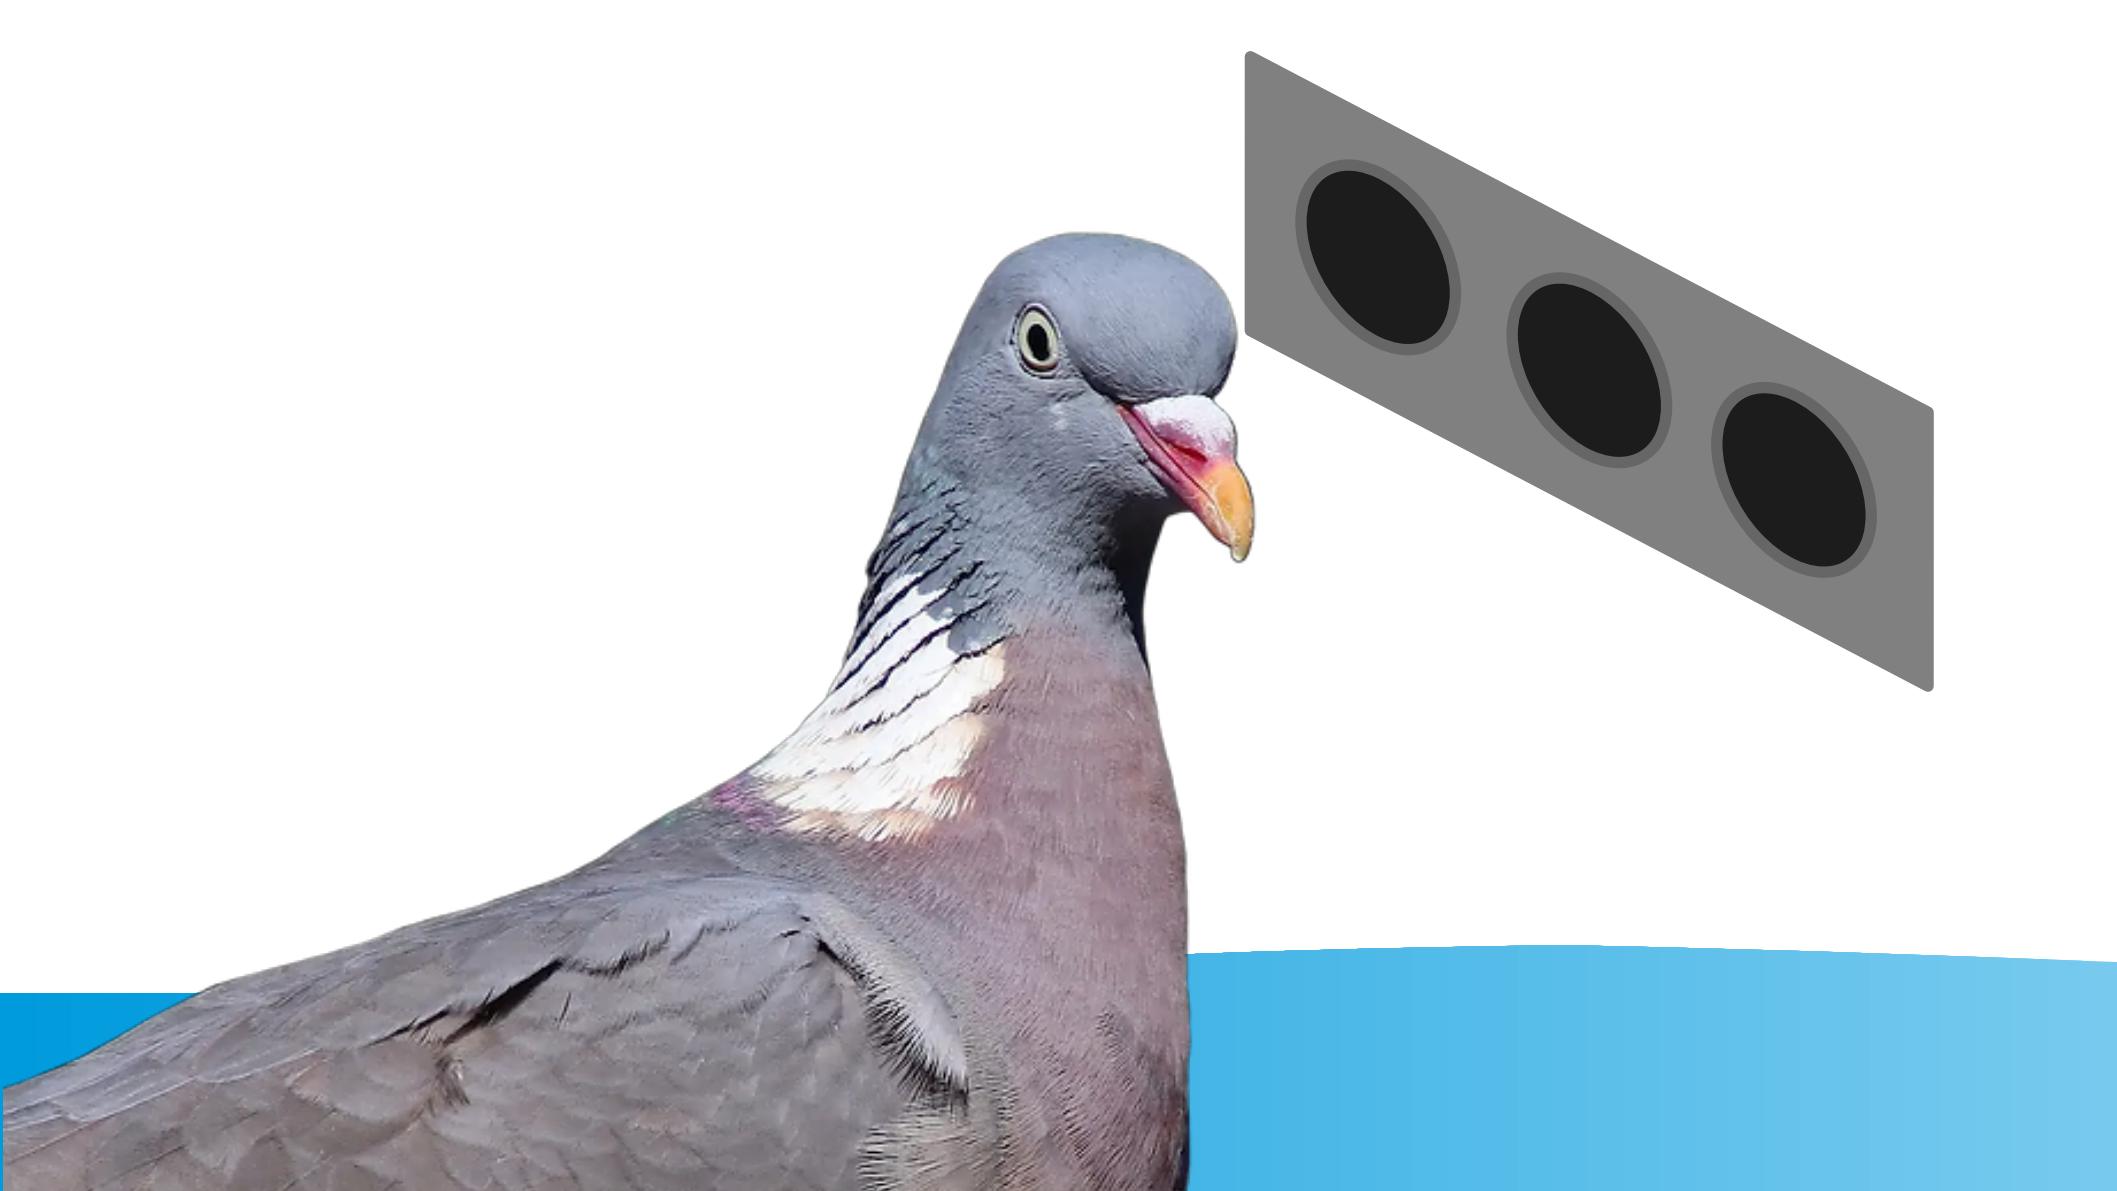

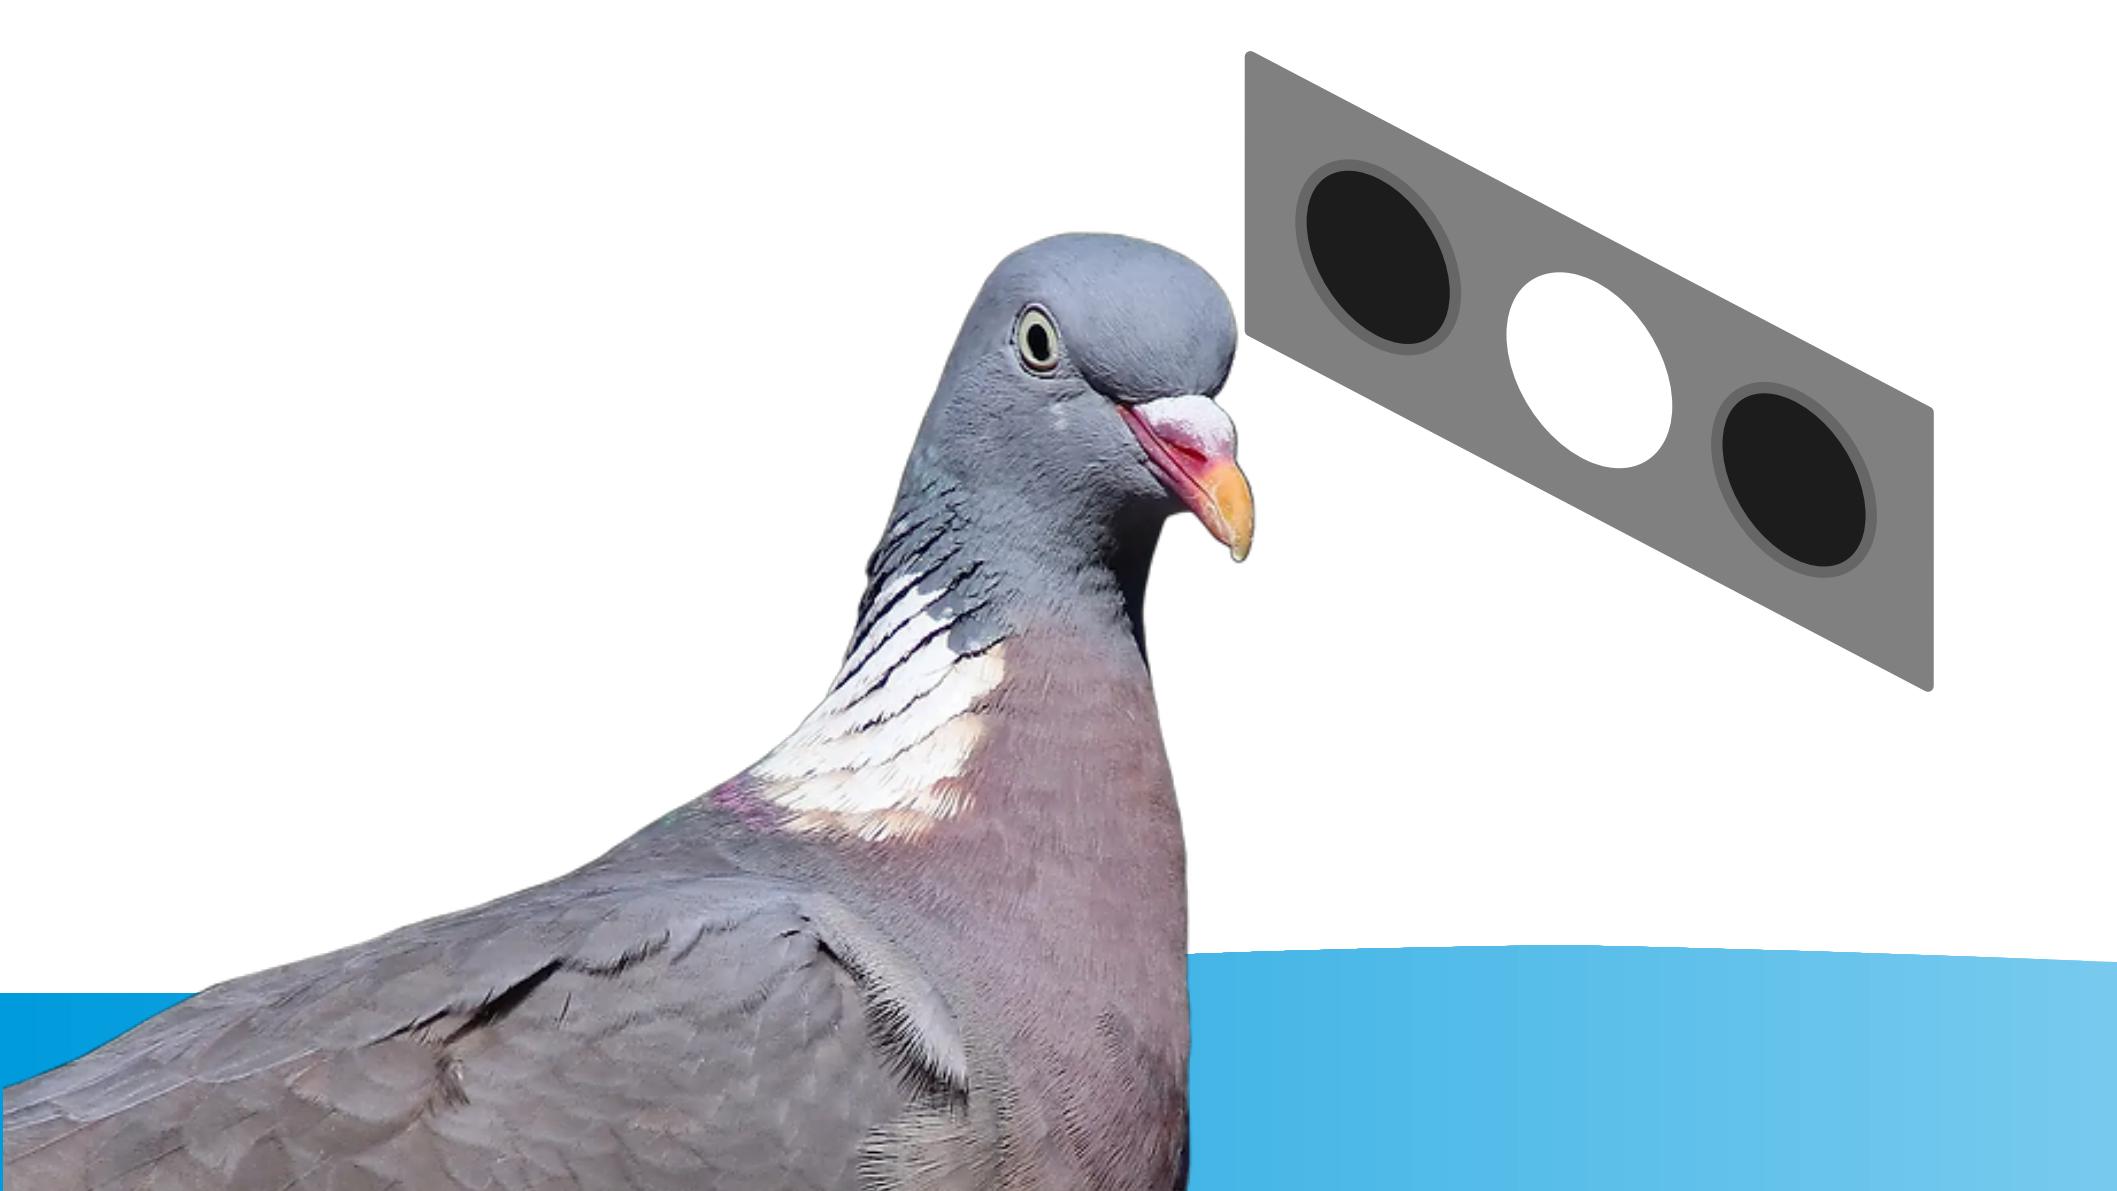

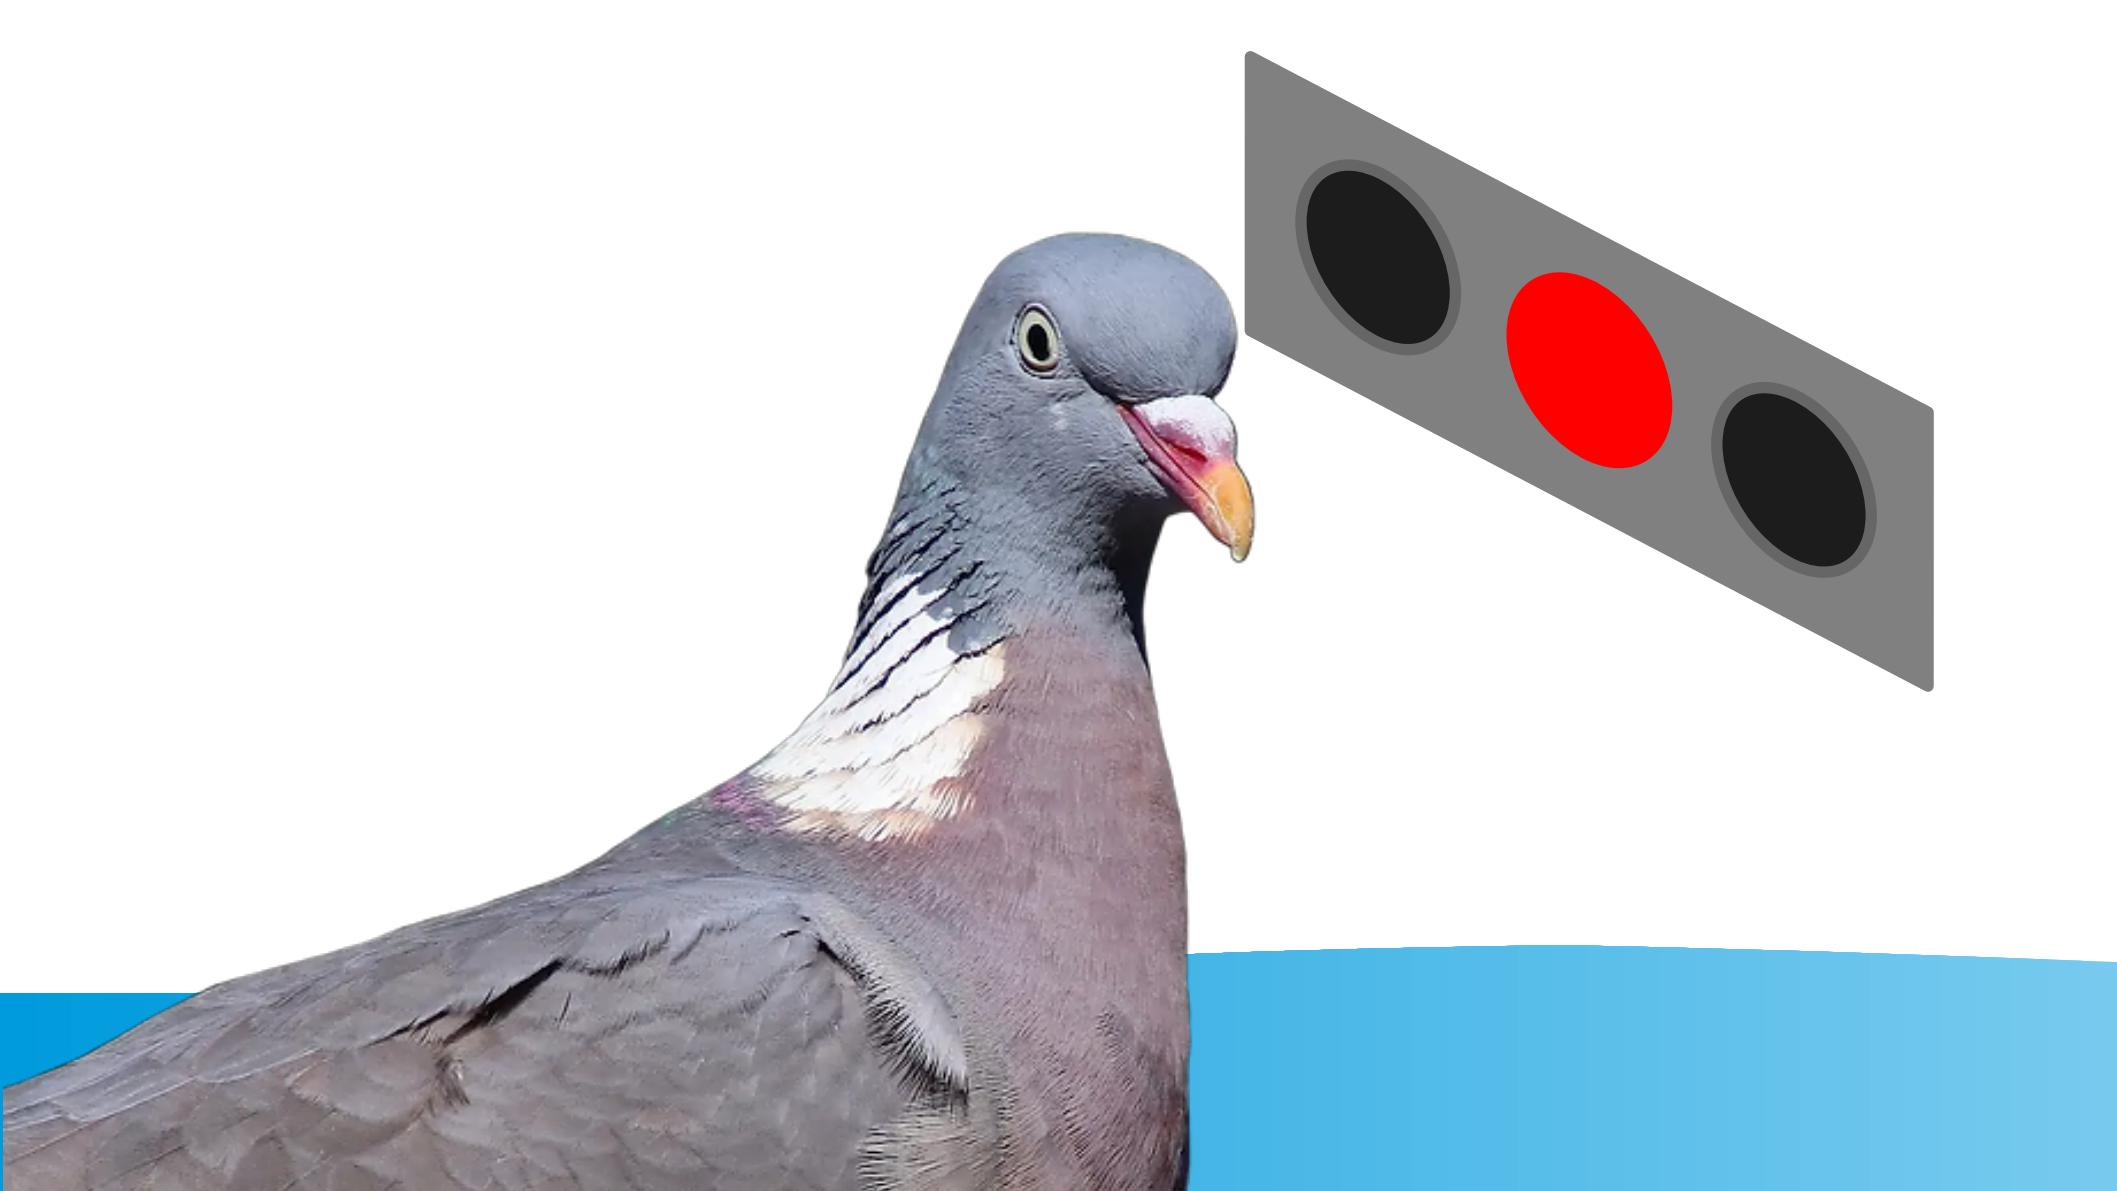

¿De qué color era la línea?

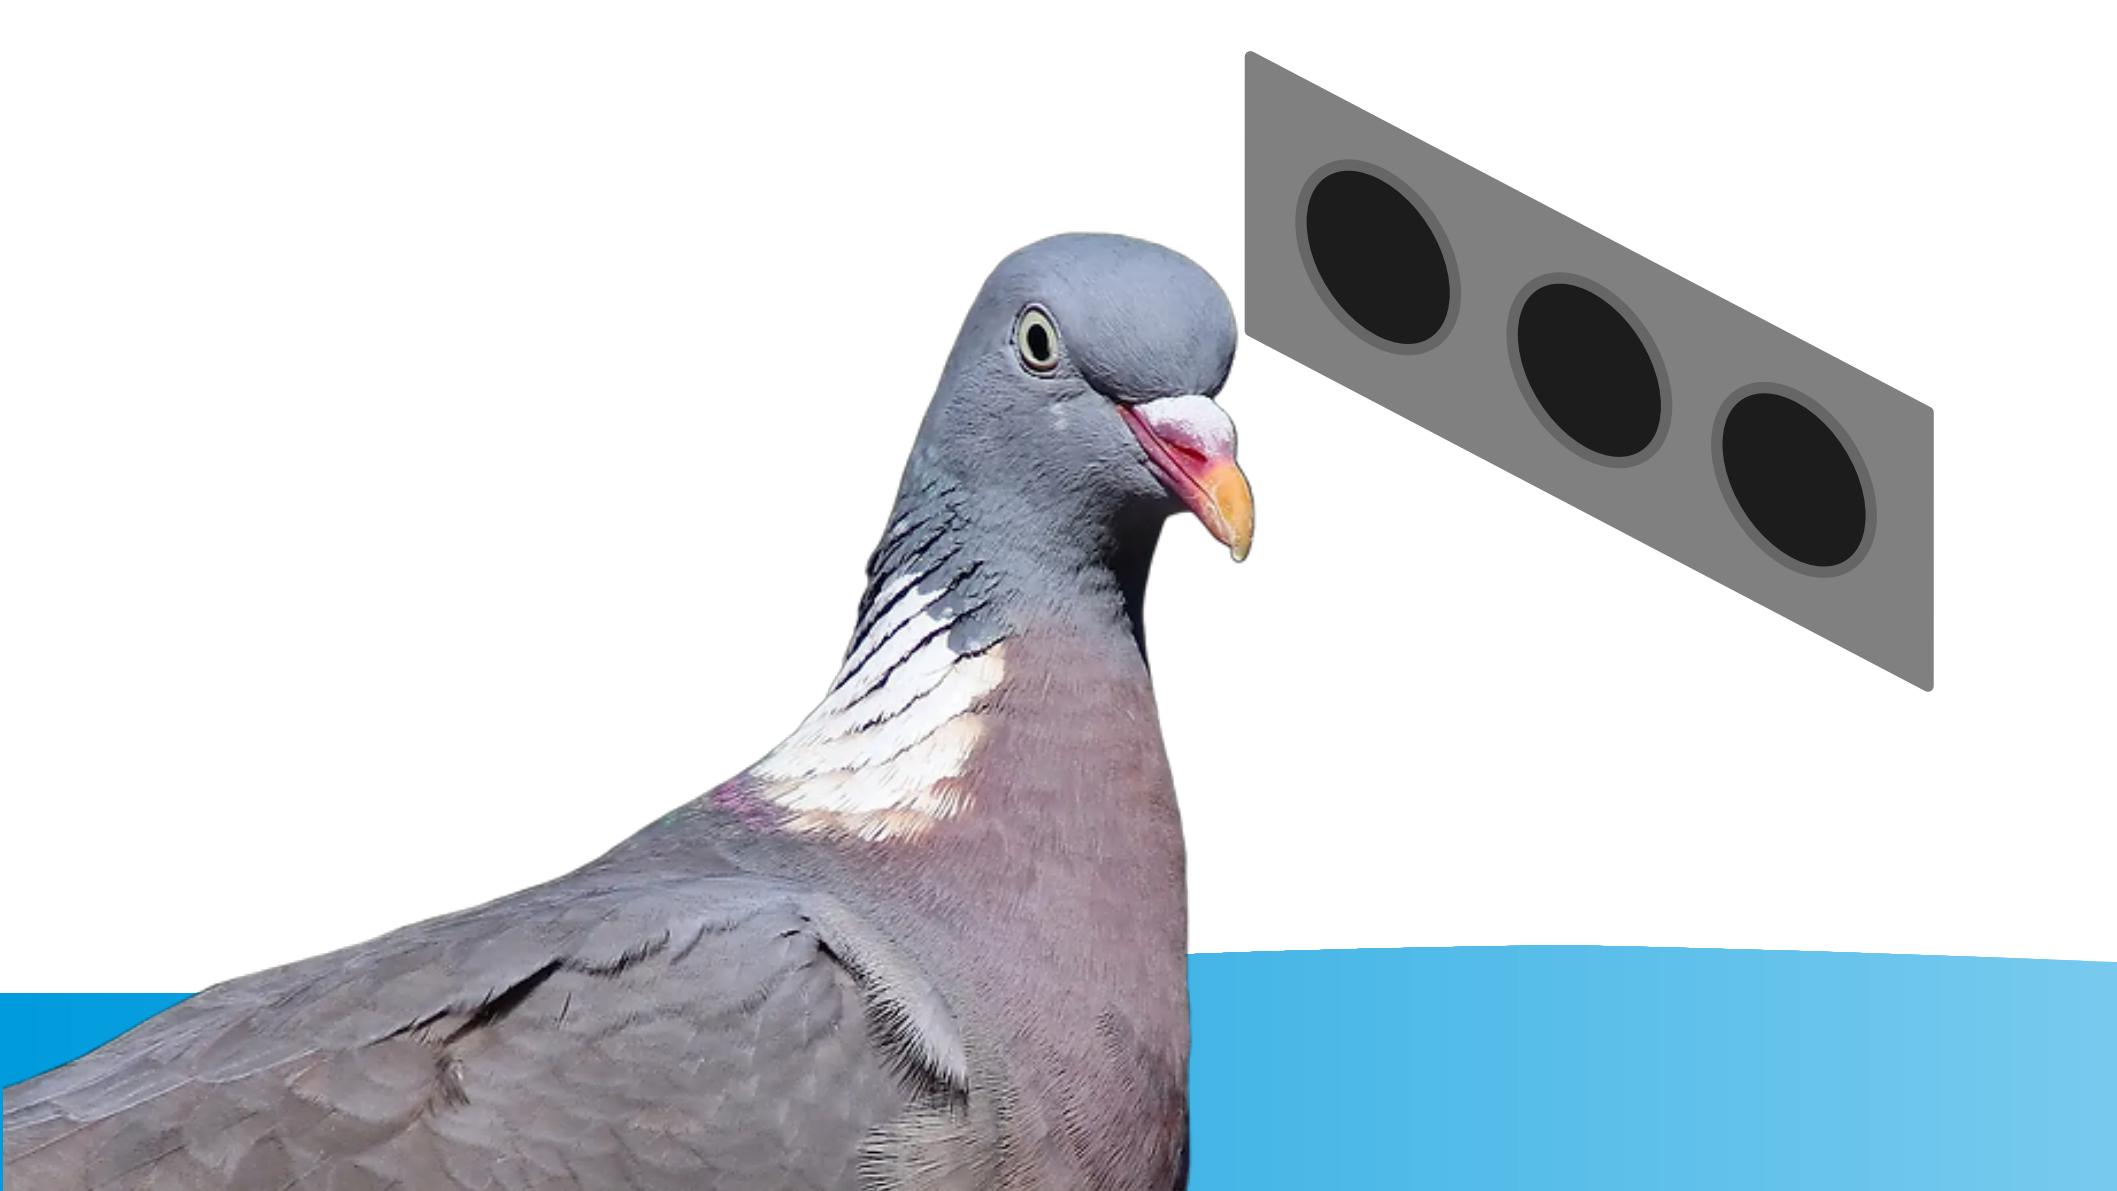

¿De qué grosor era la línea?

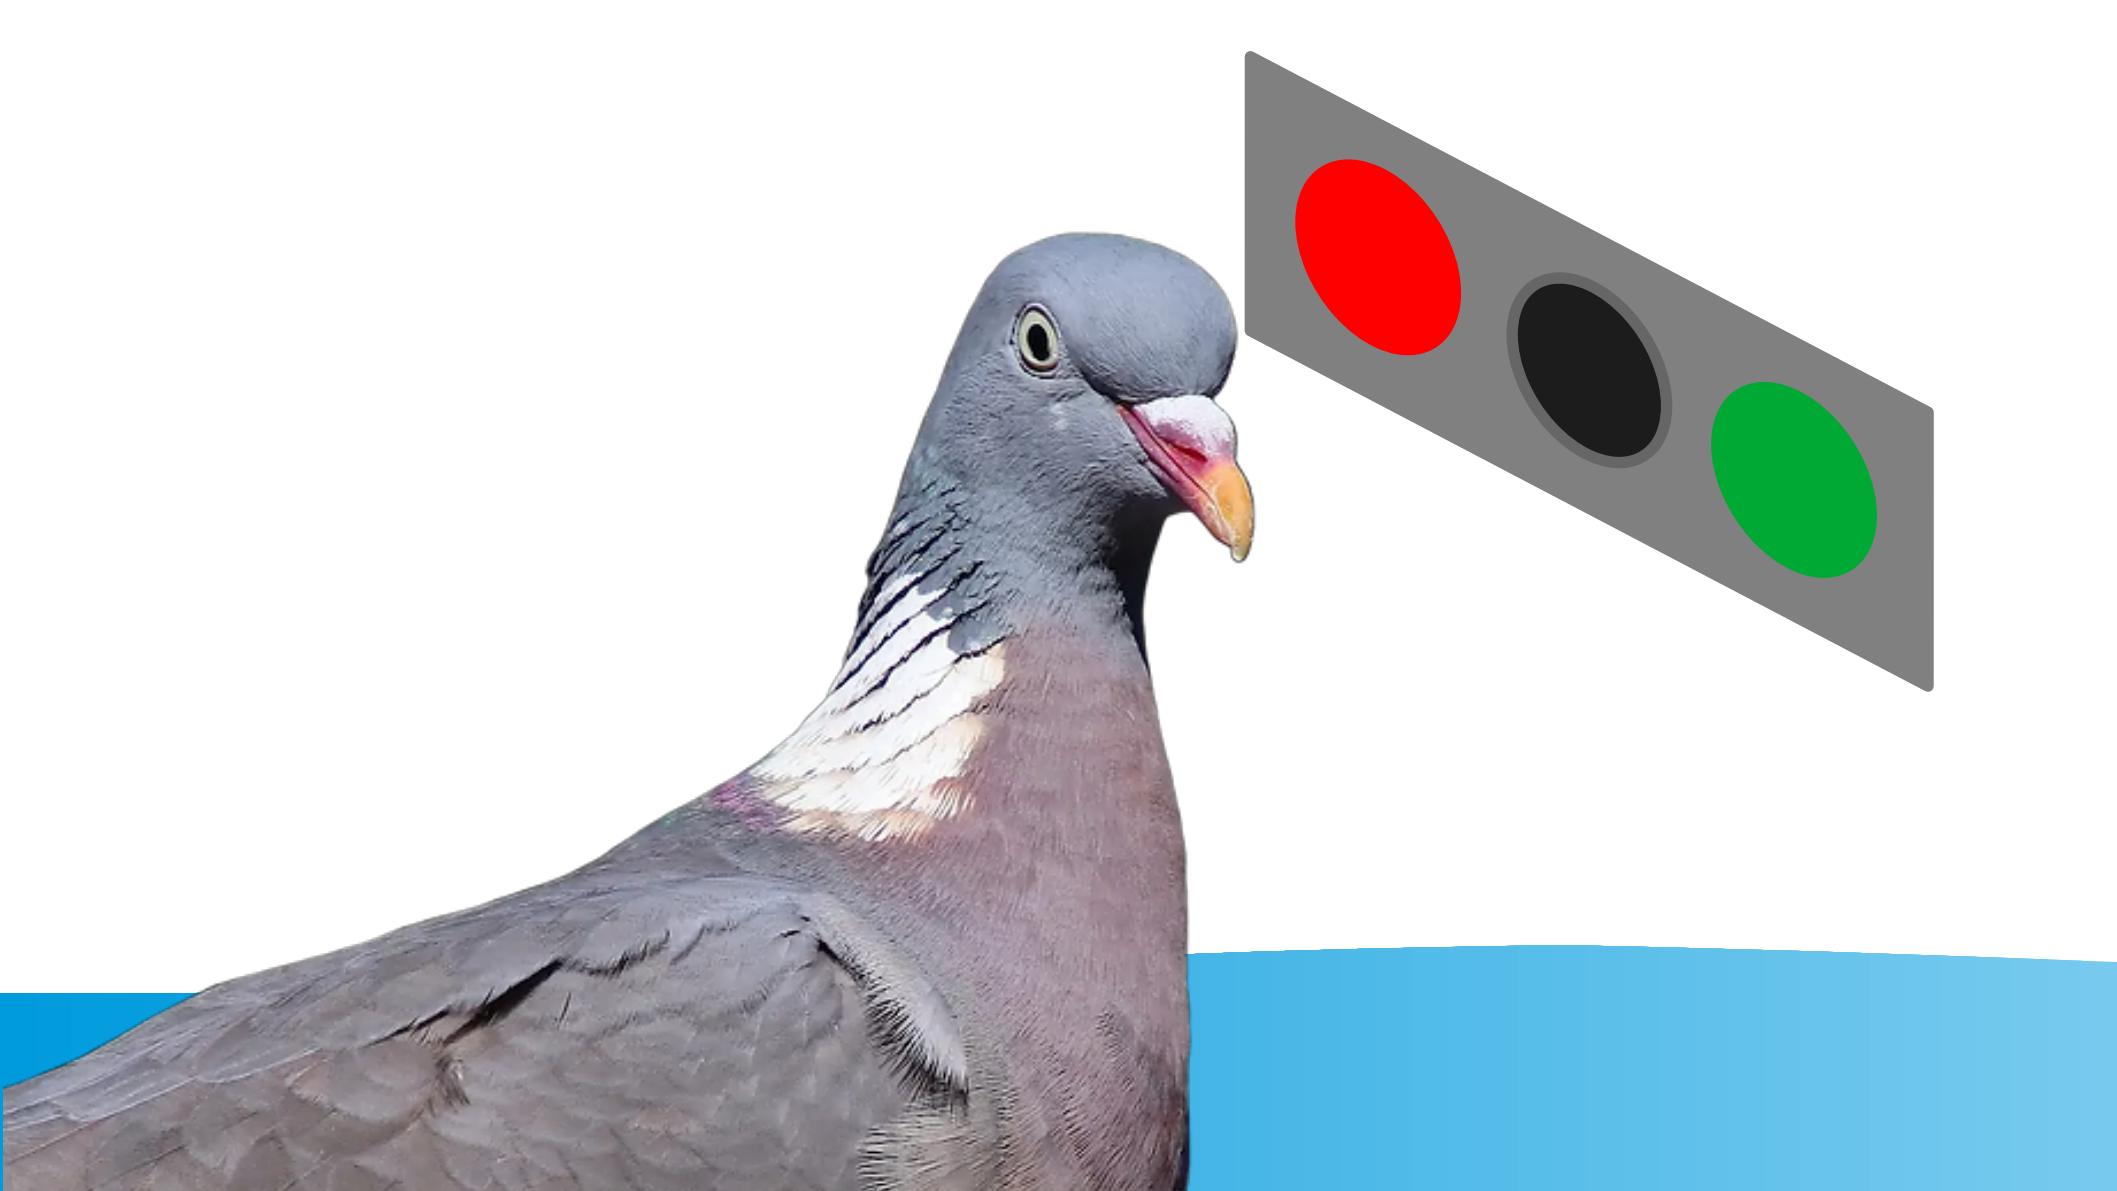

¿Qué inclinación tenía la línea?

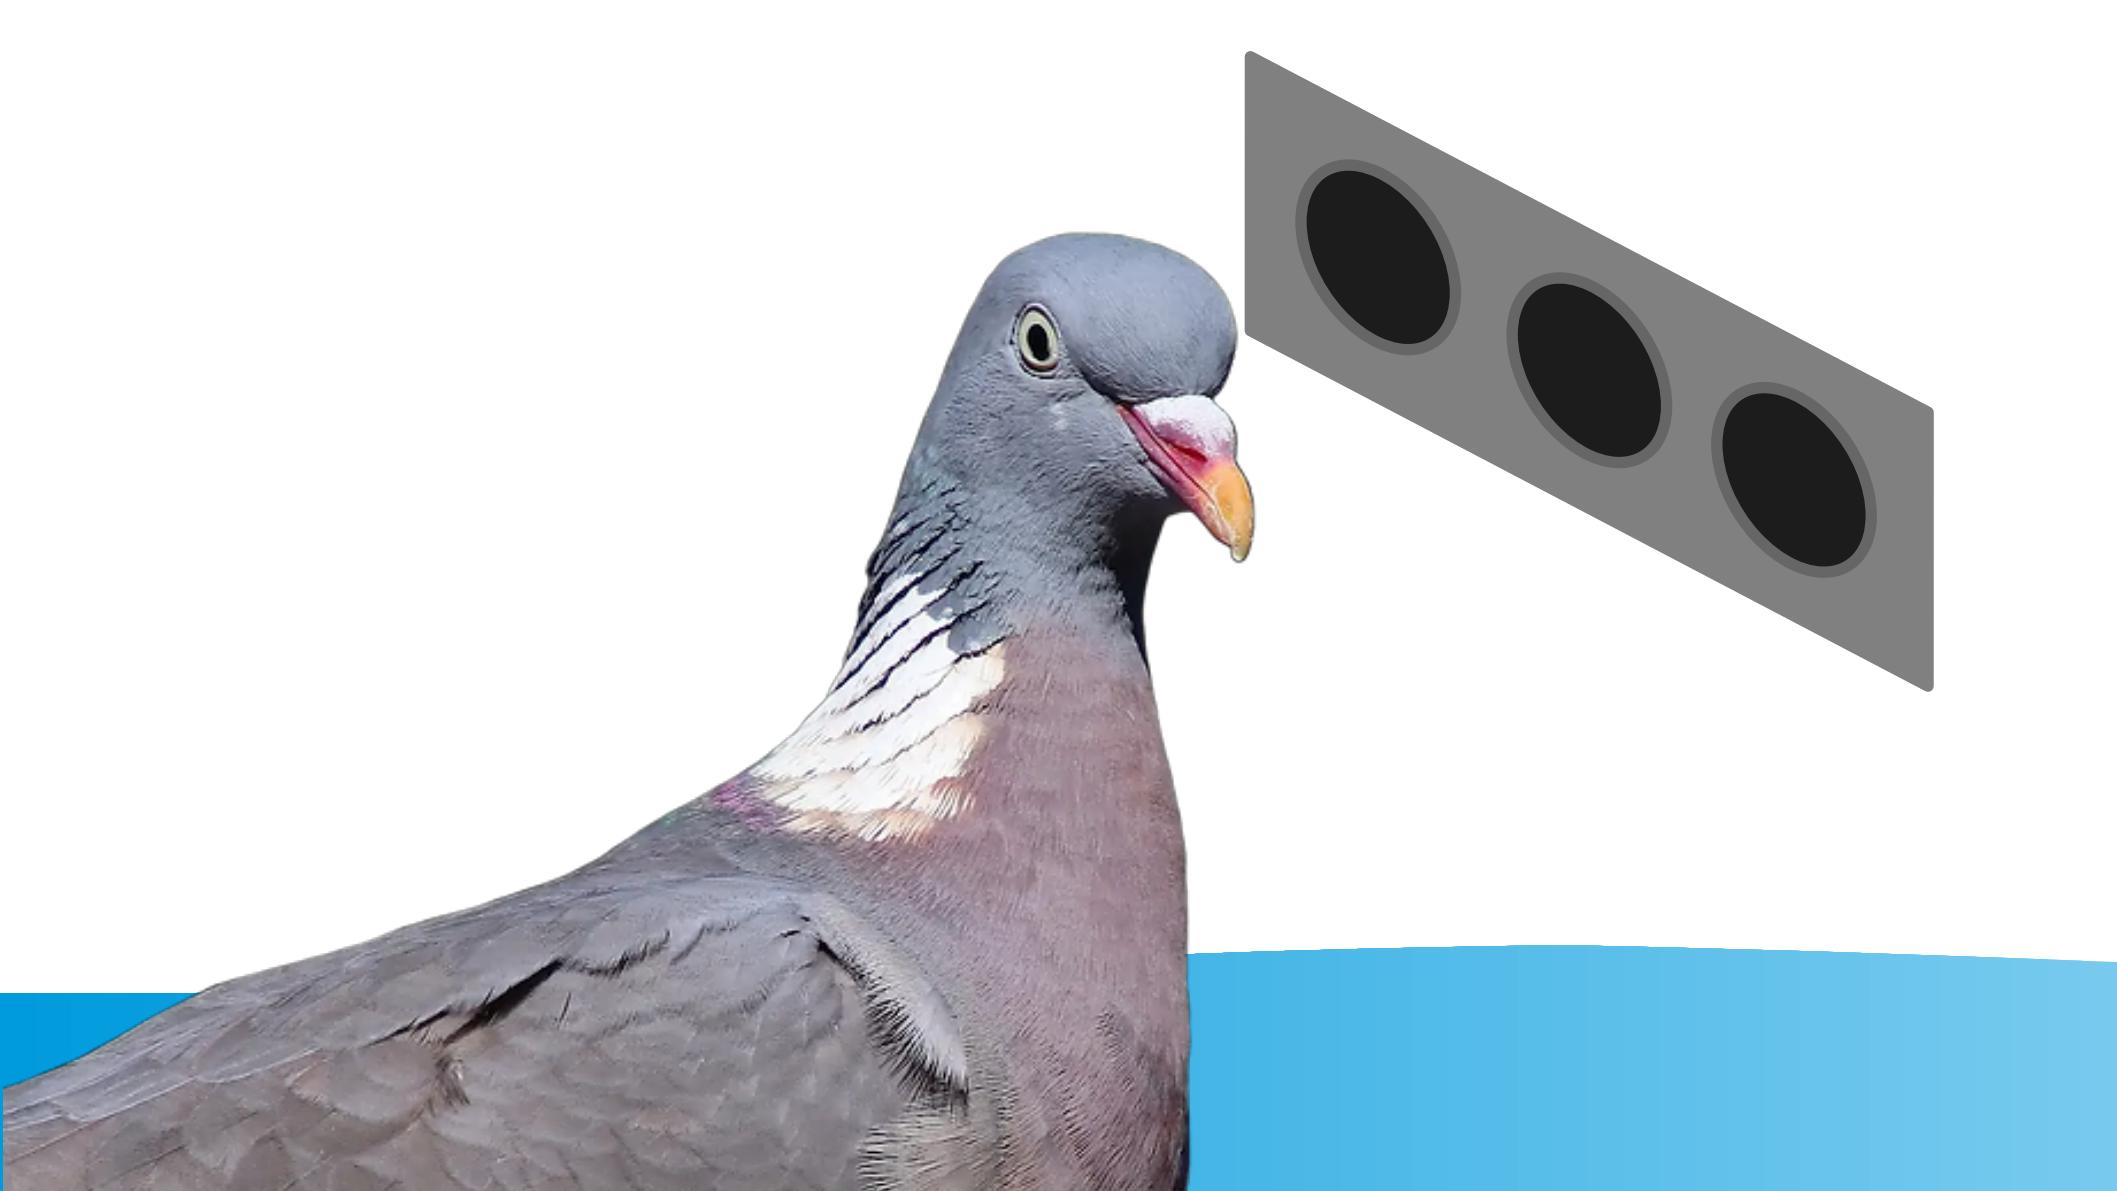

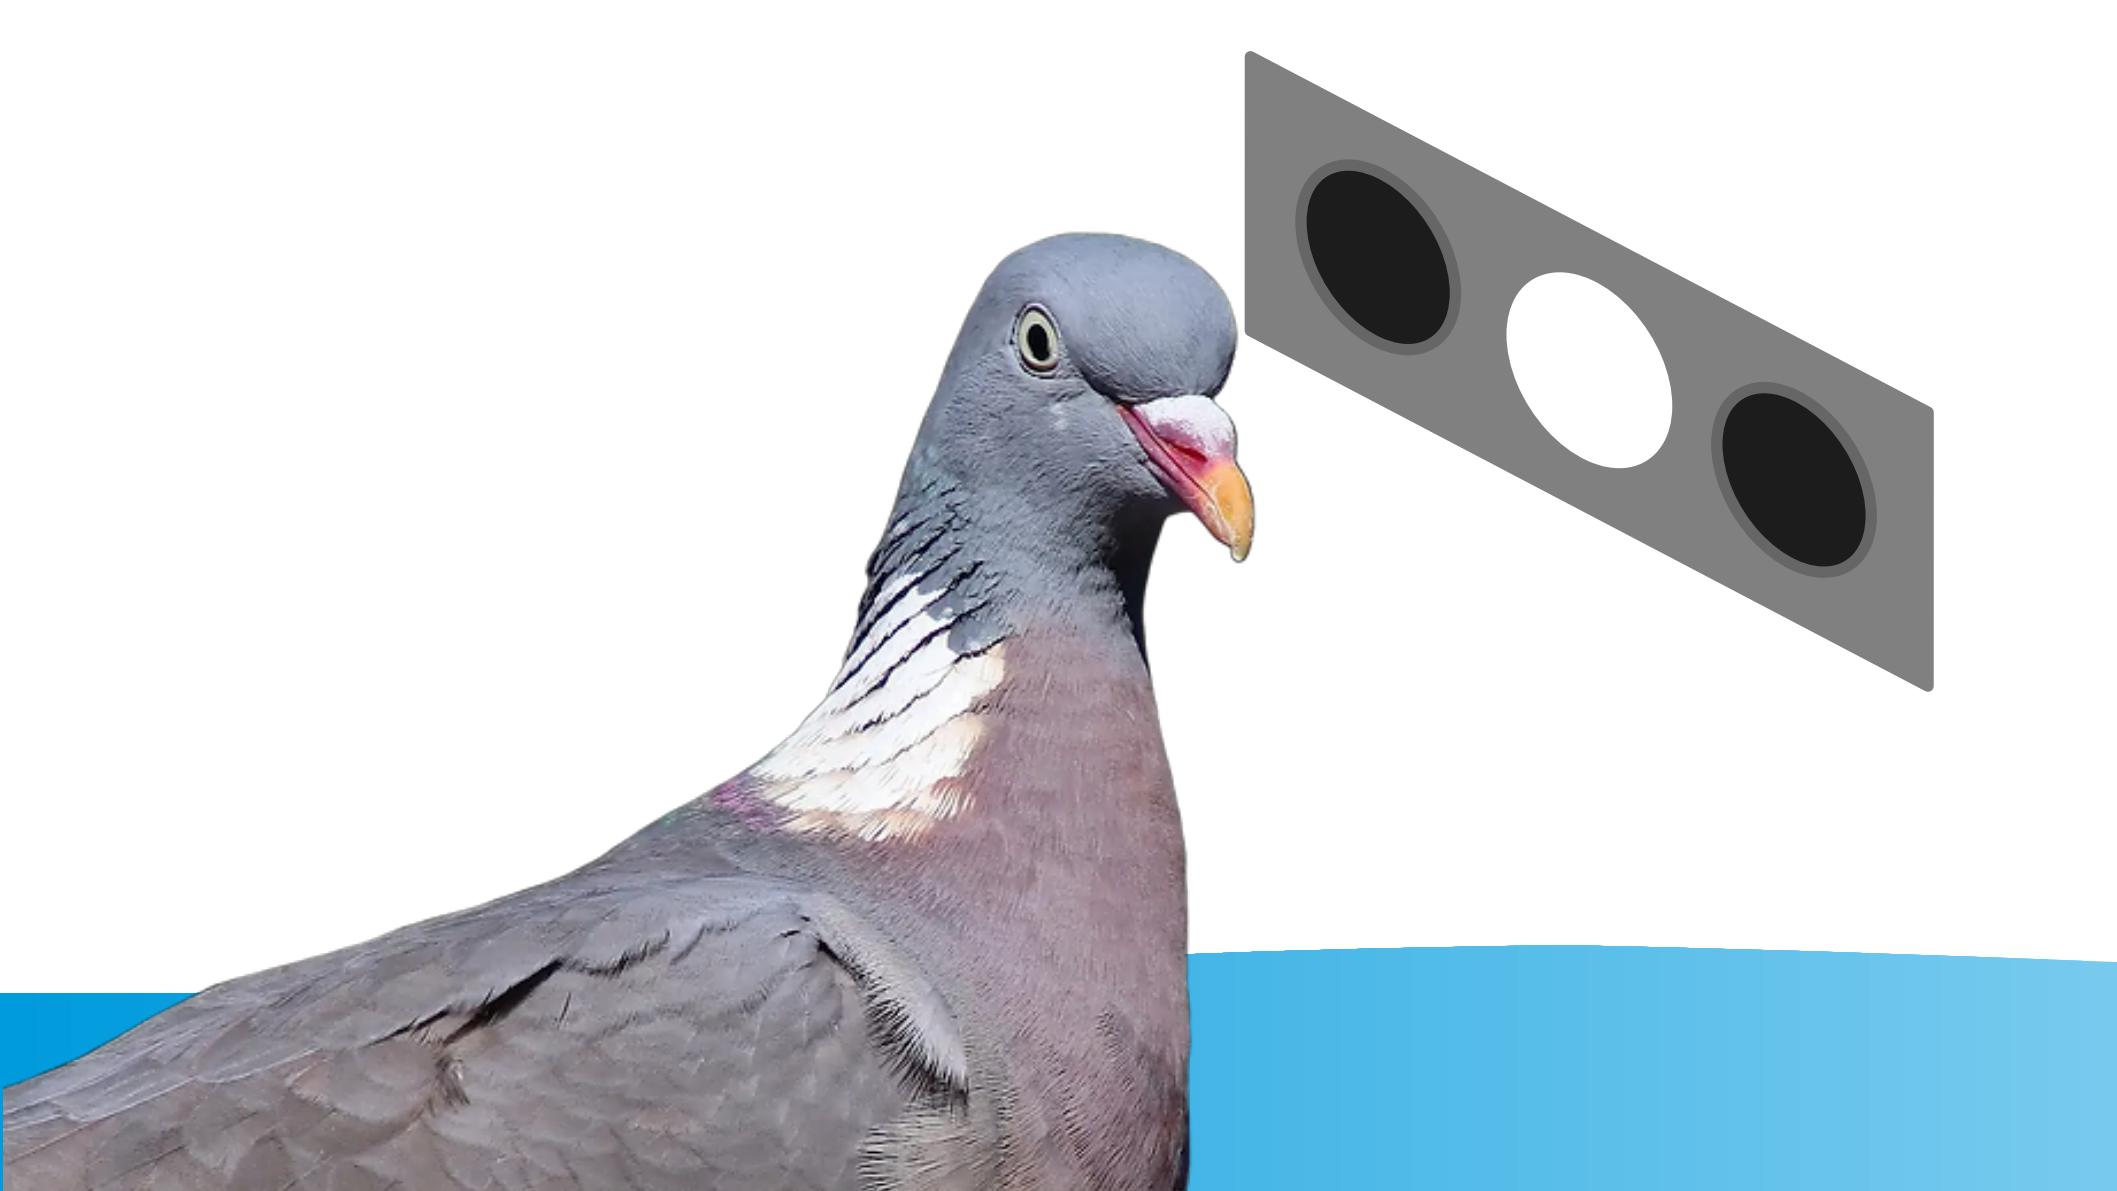

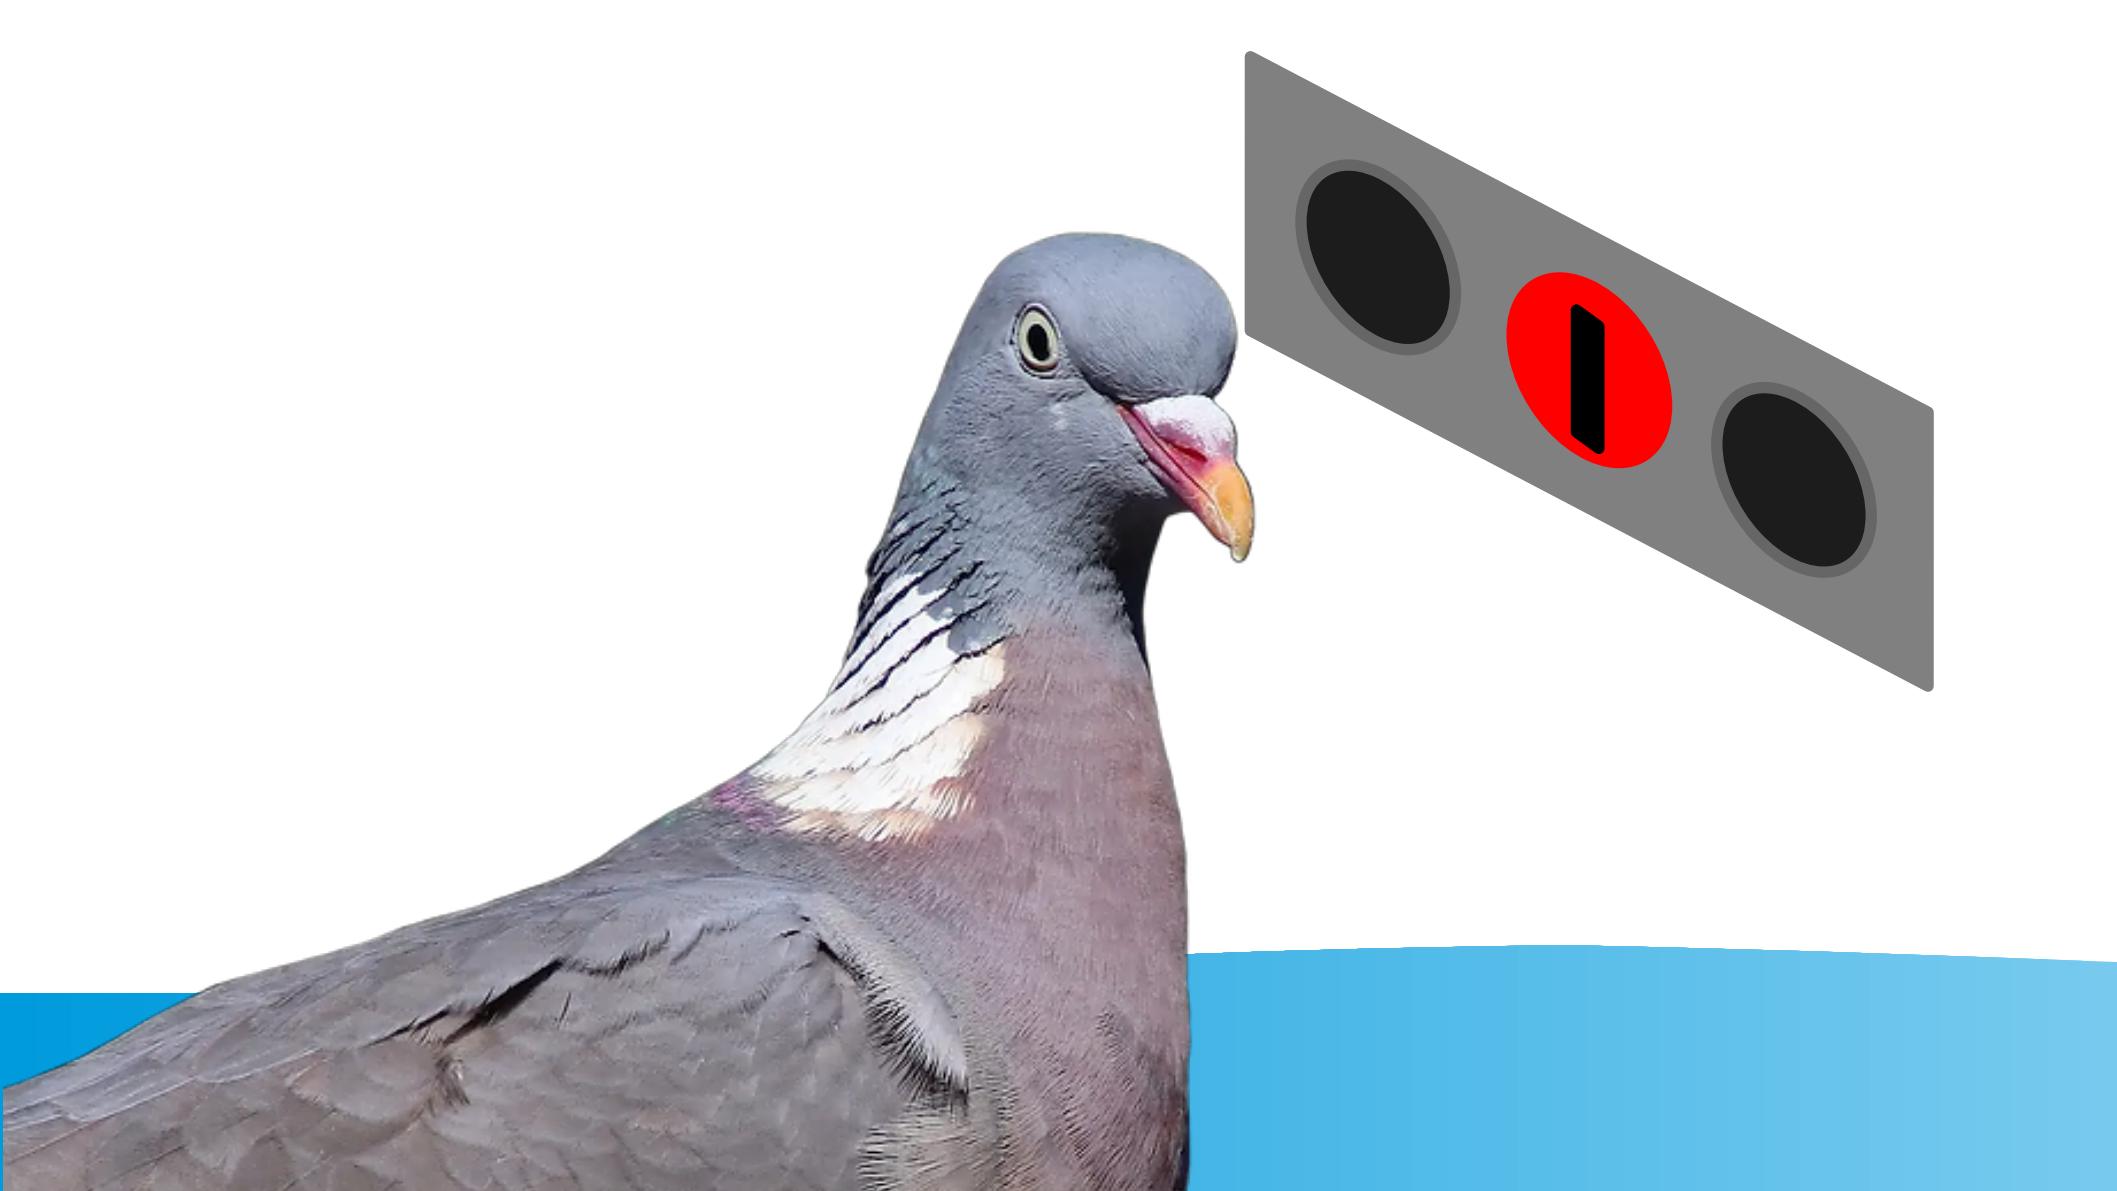

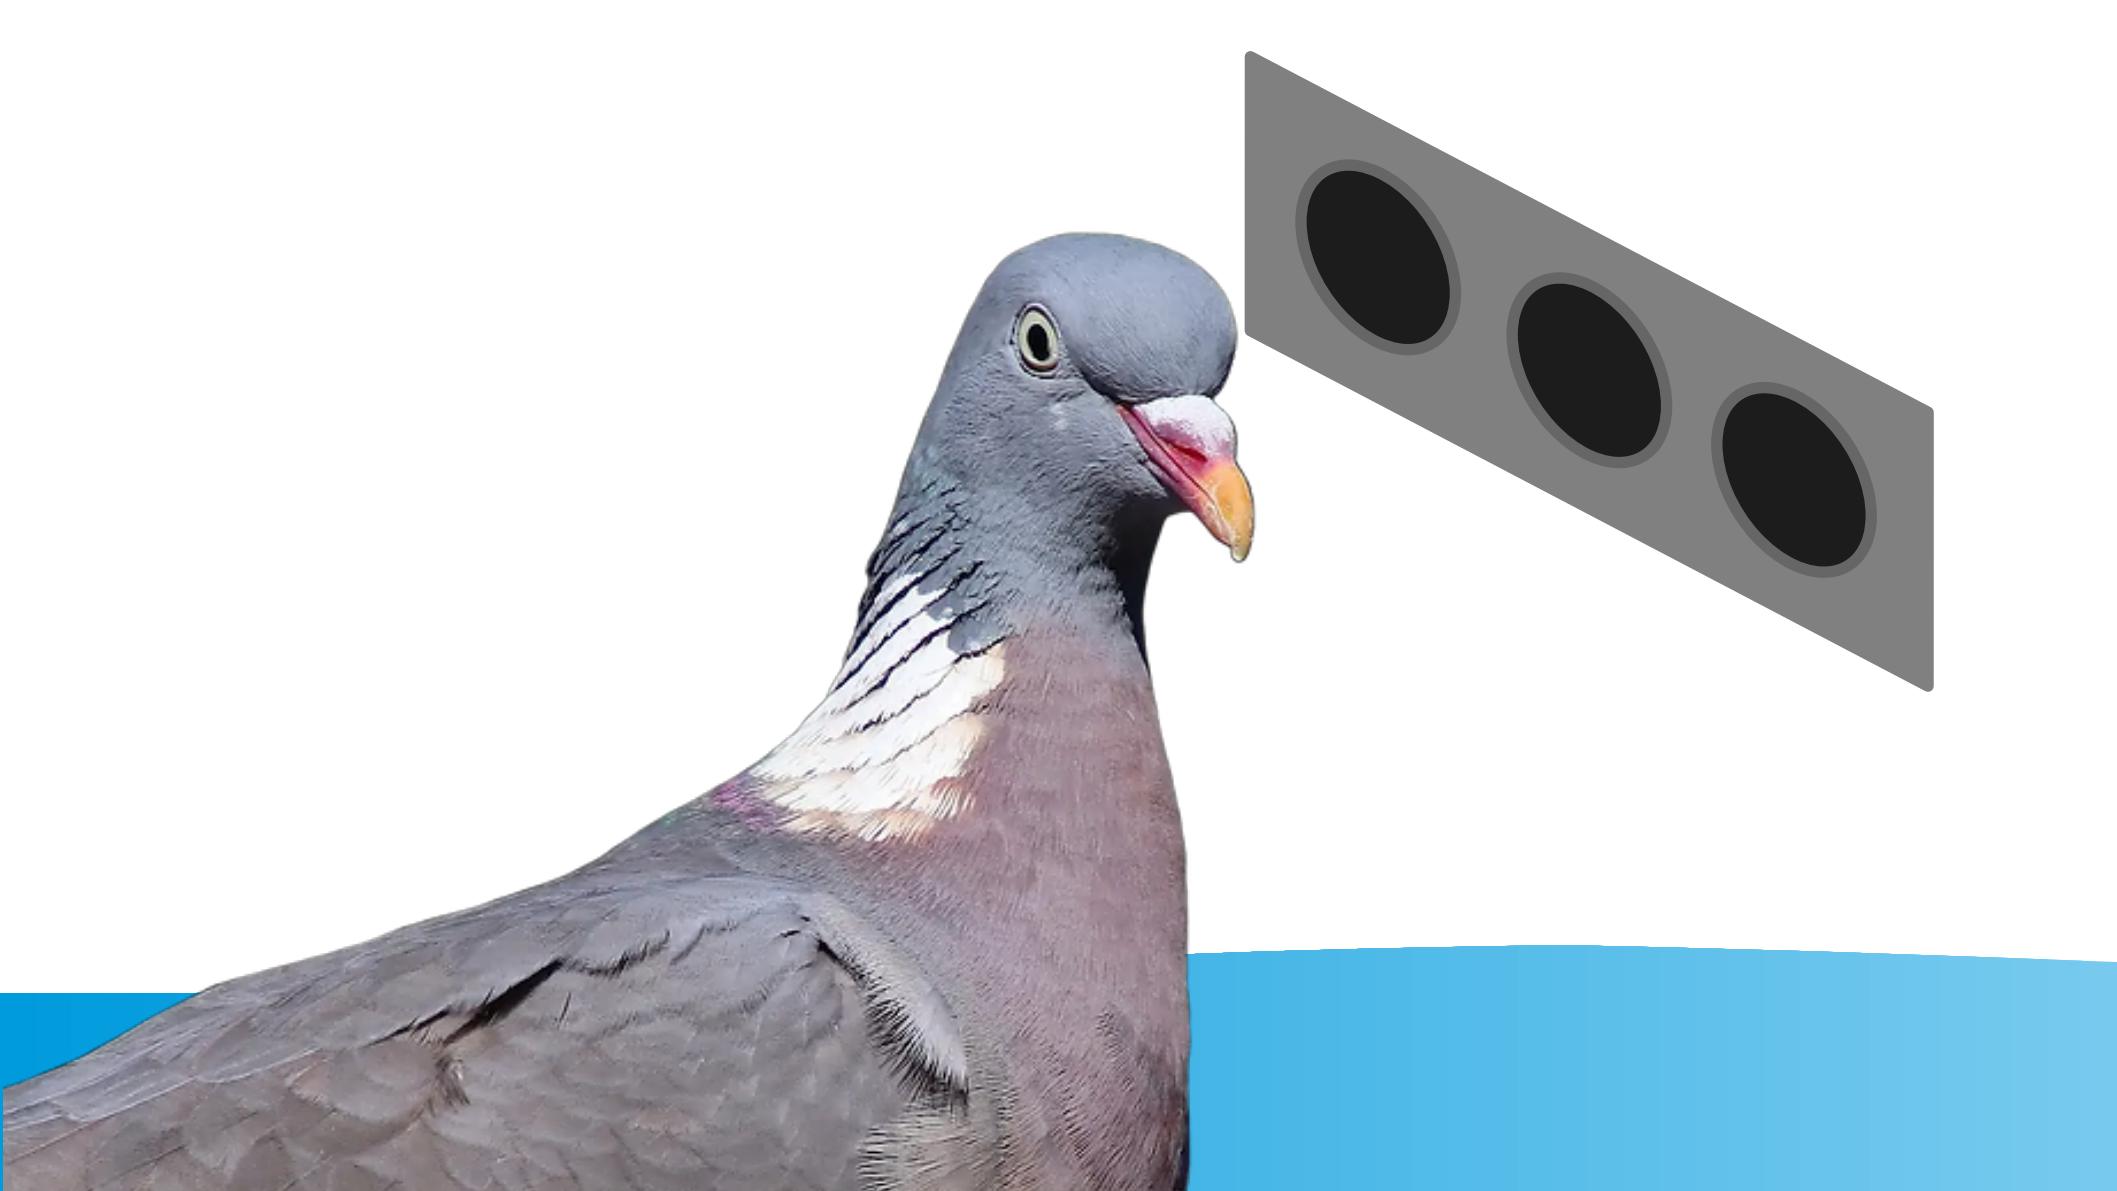

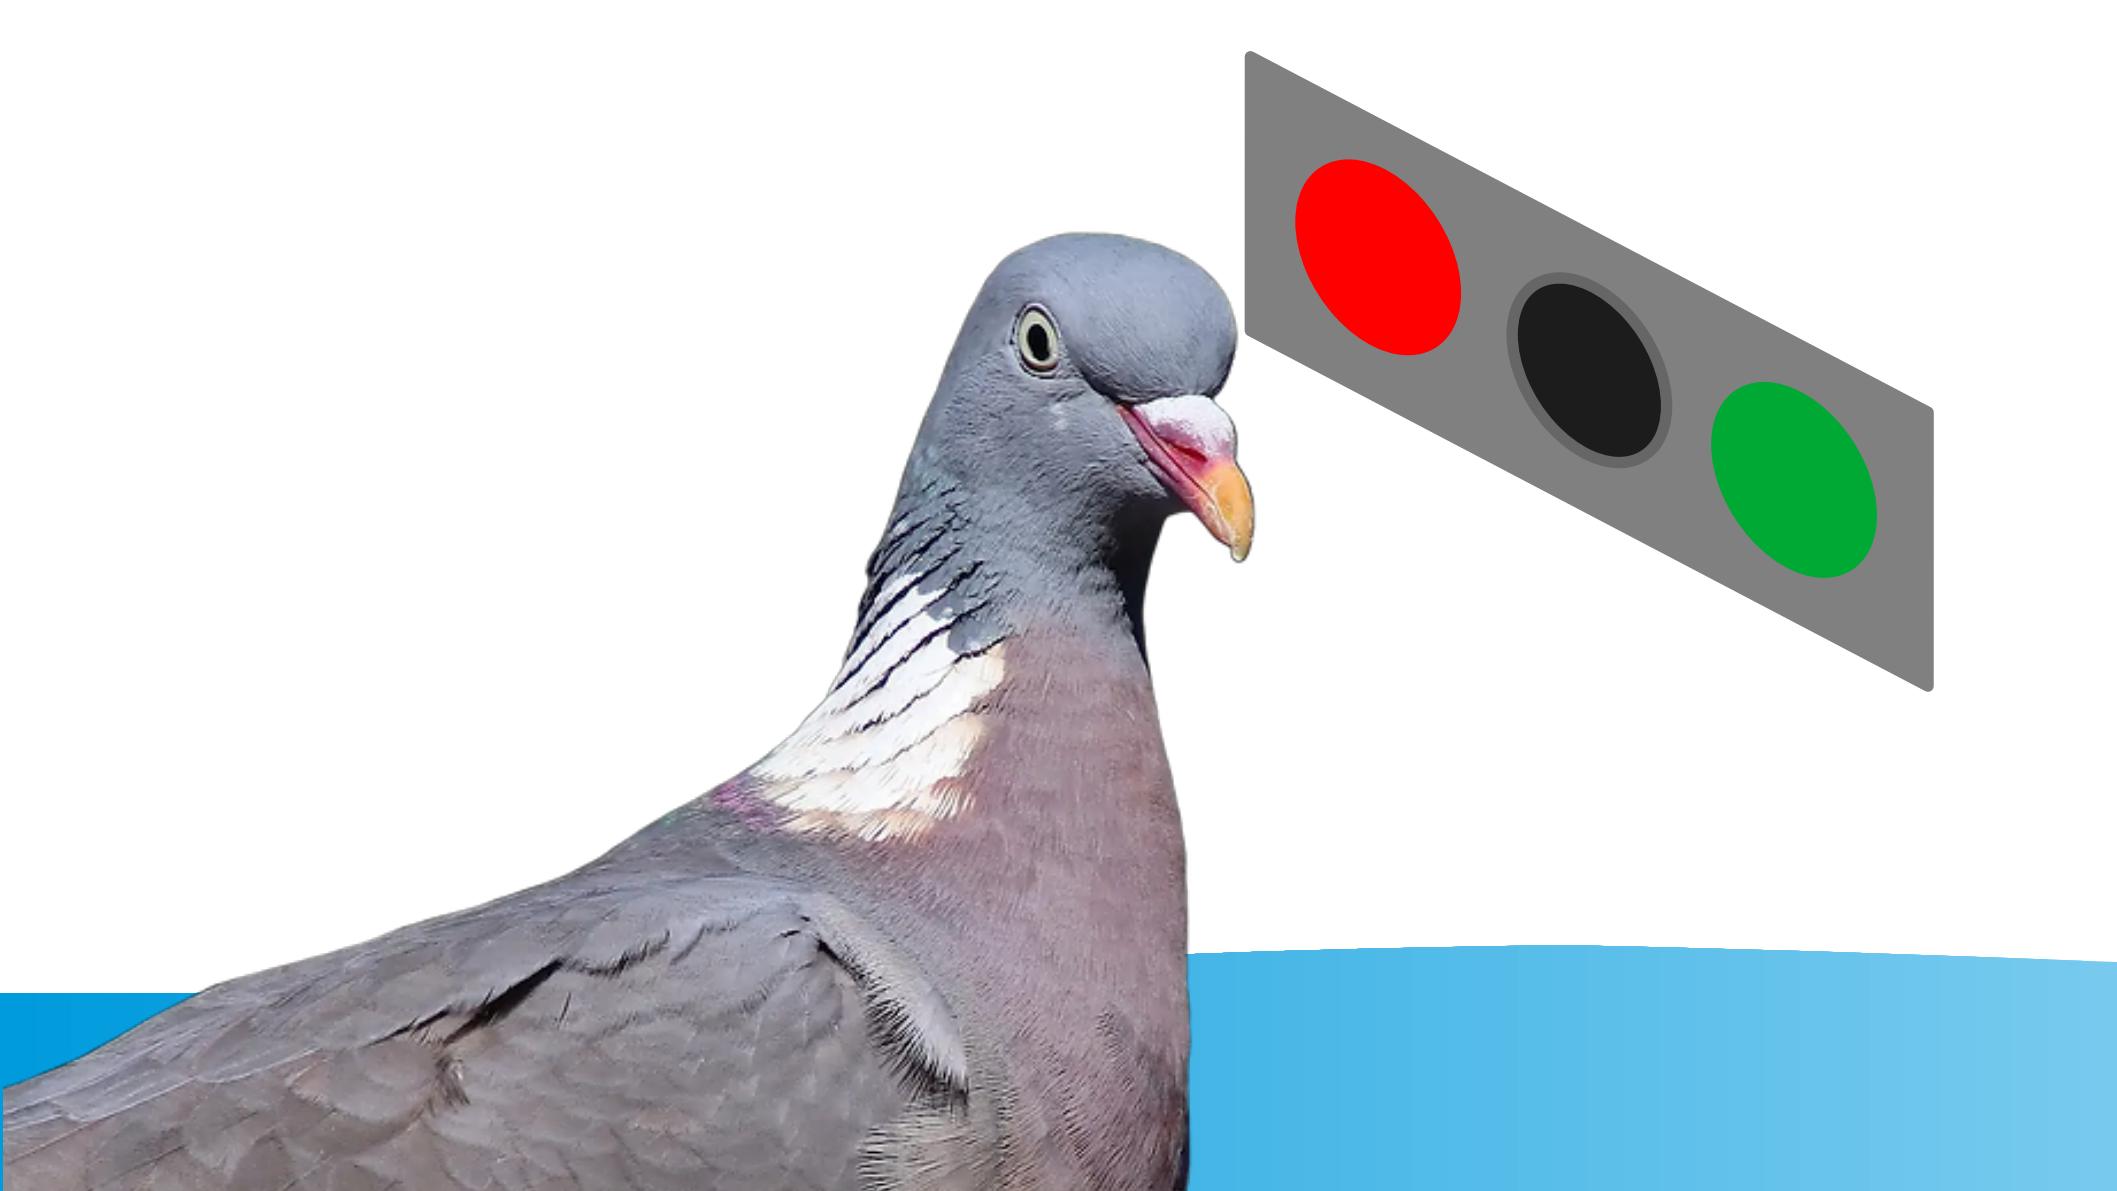

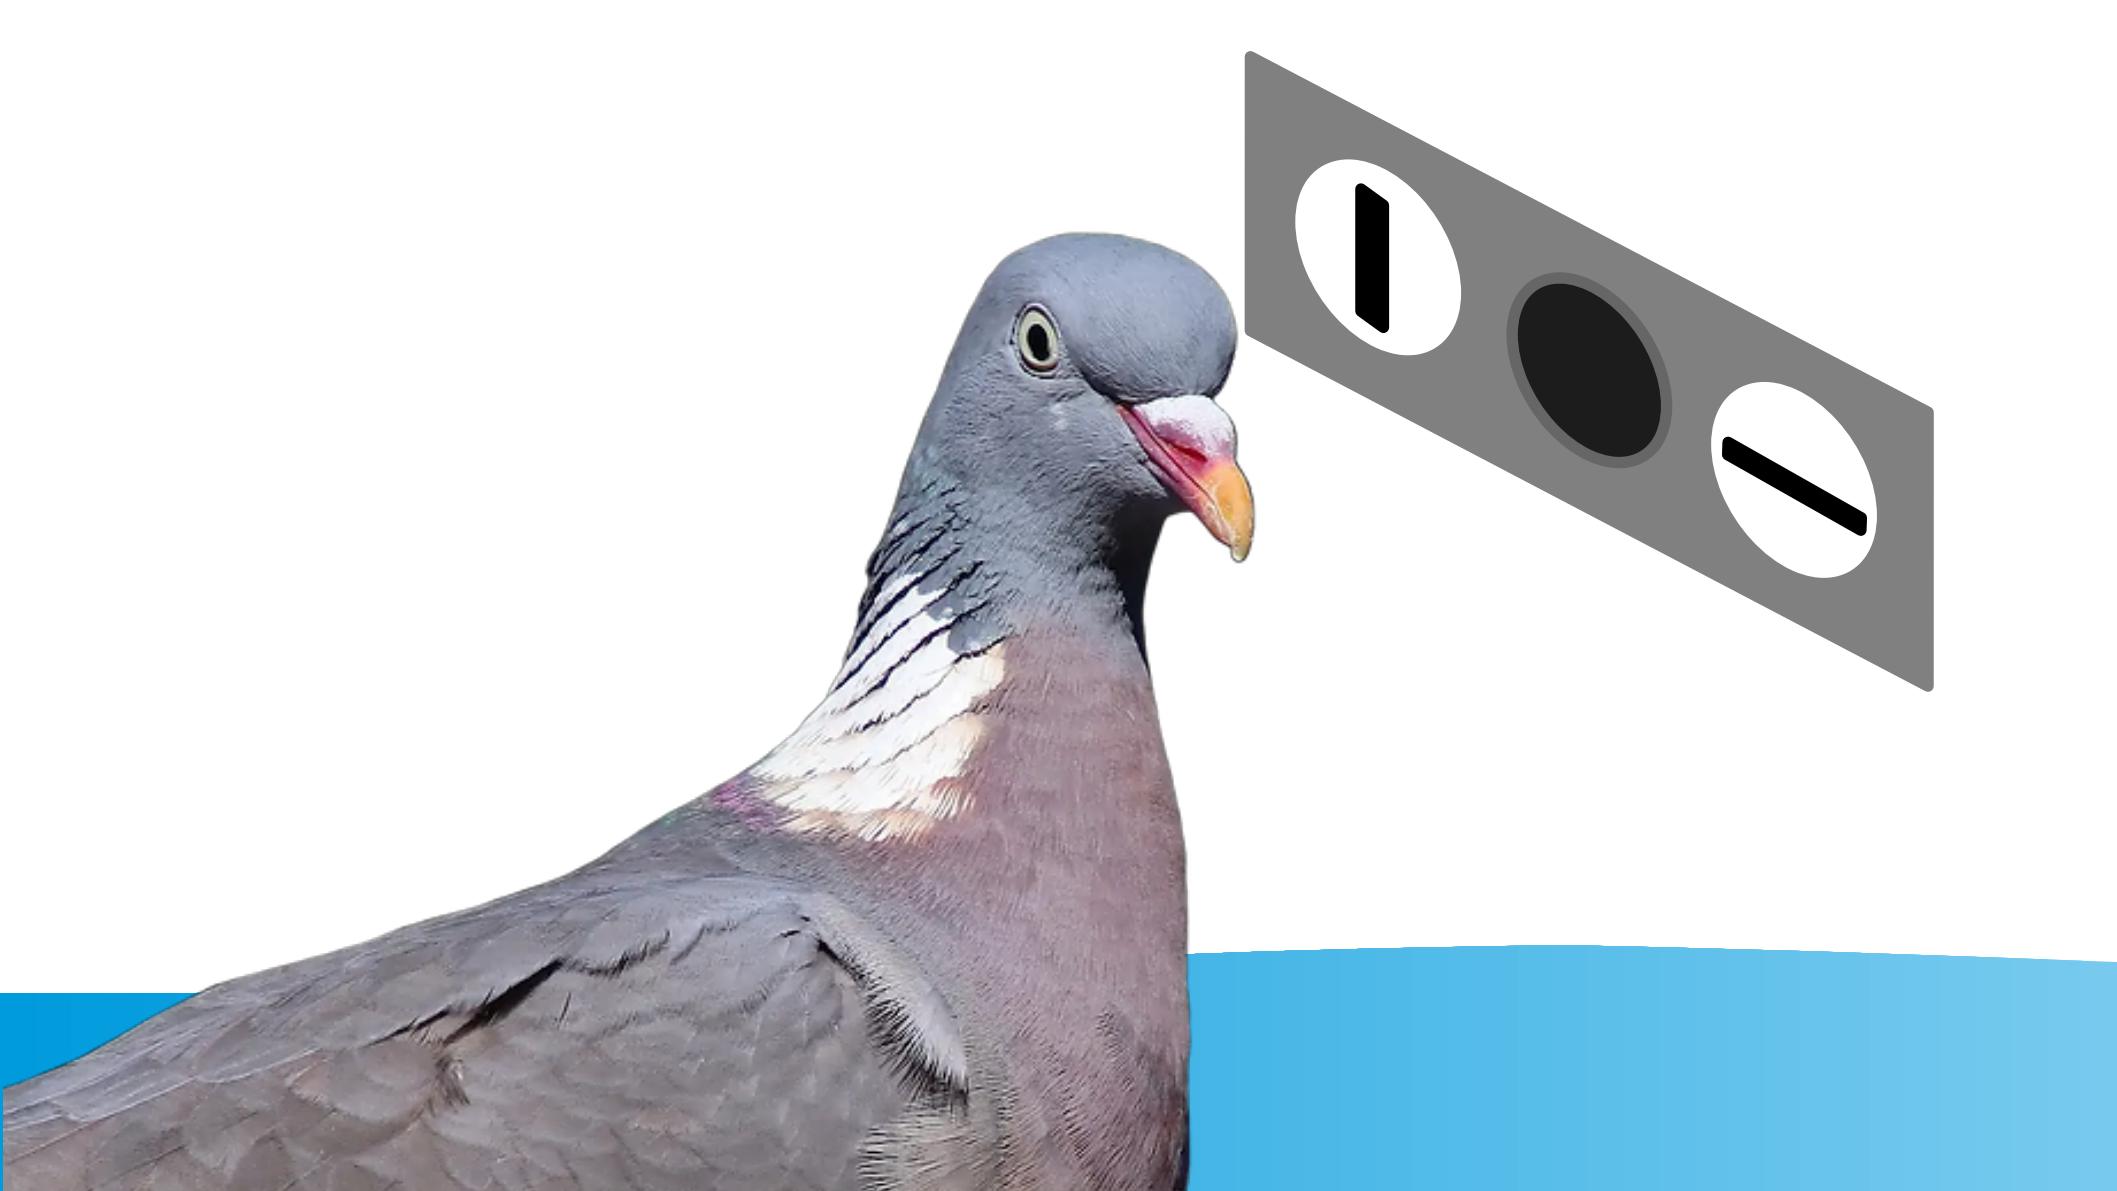

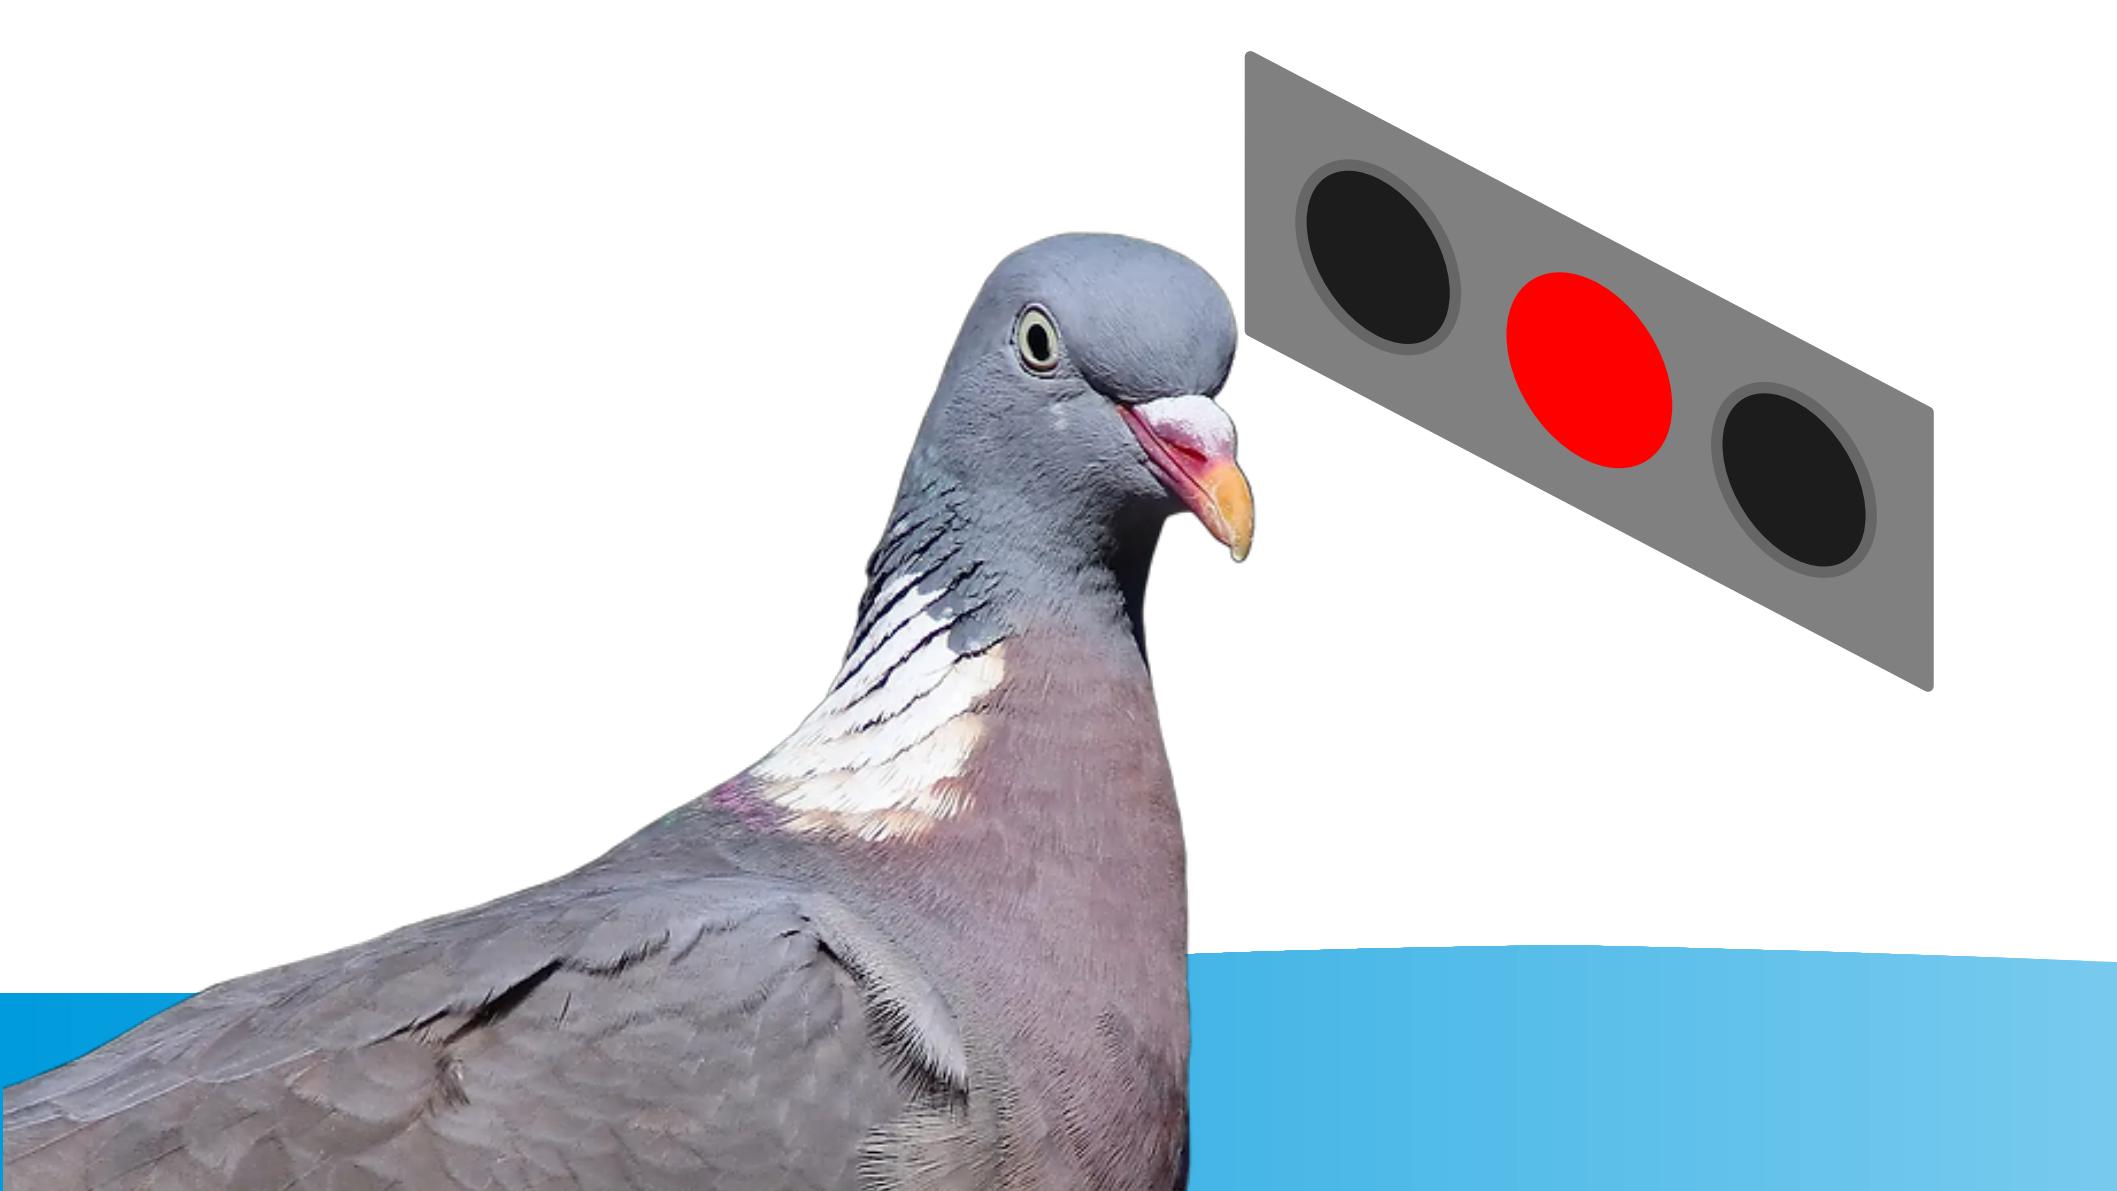

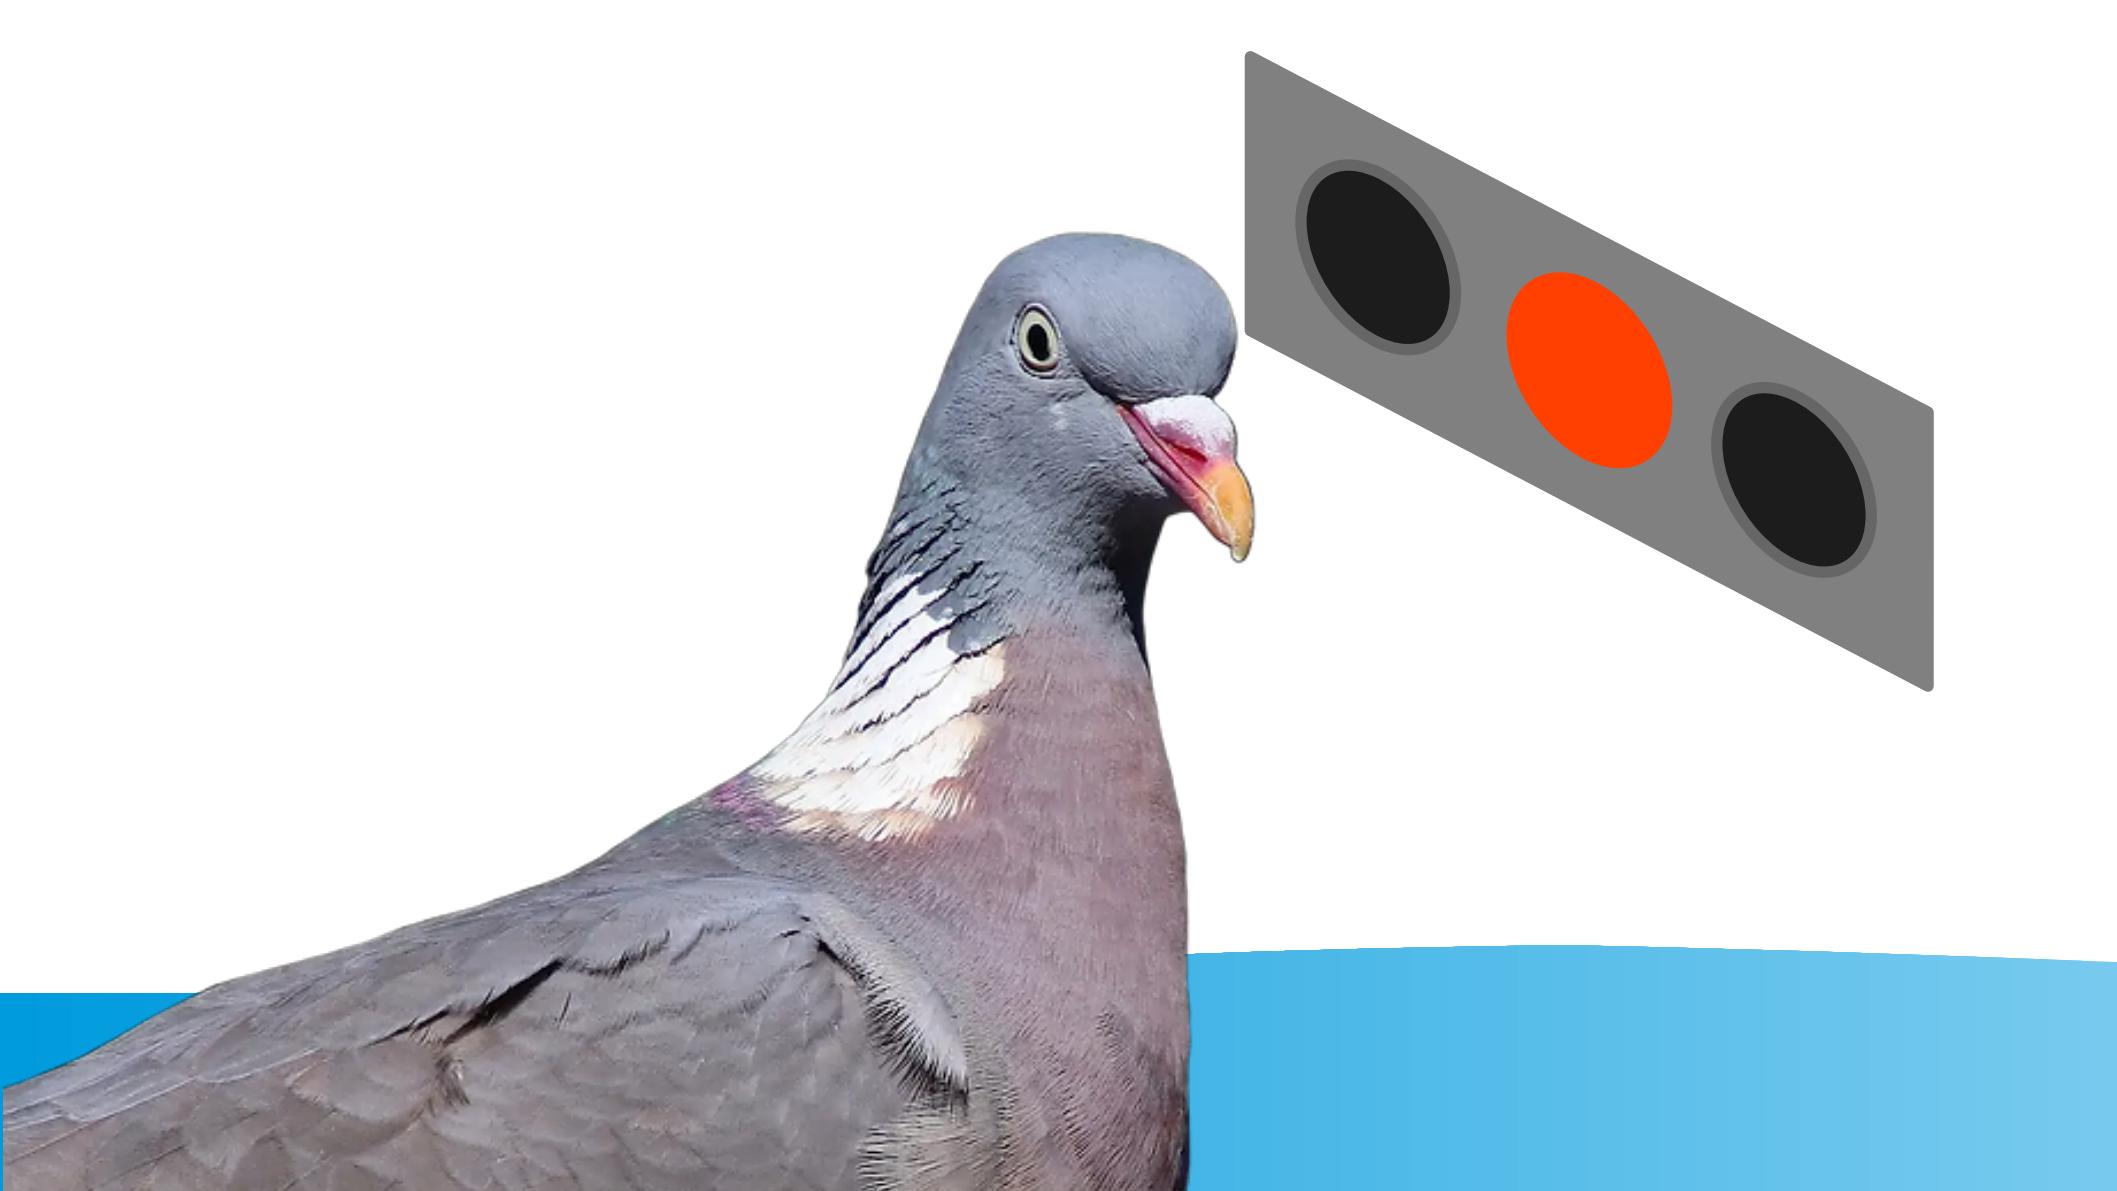

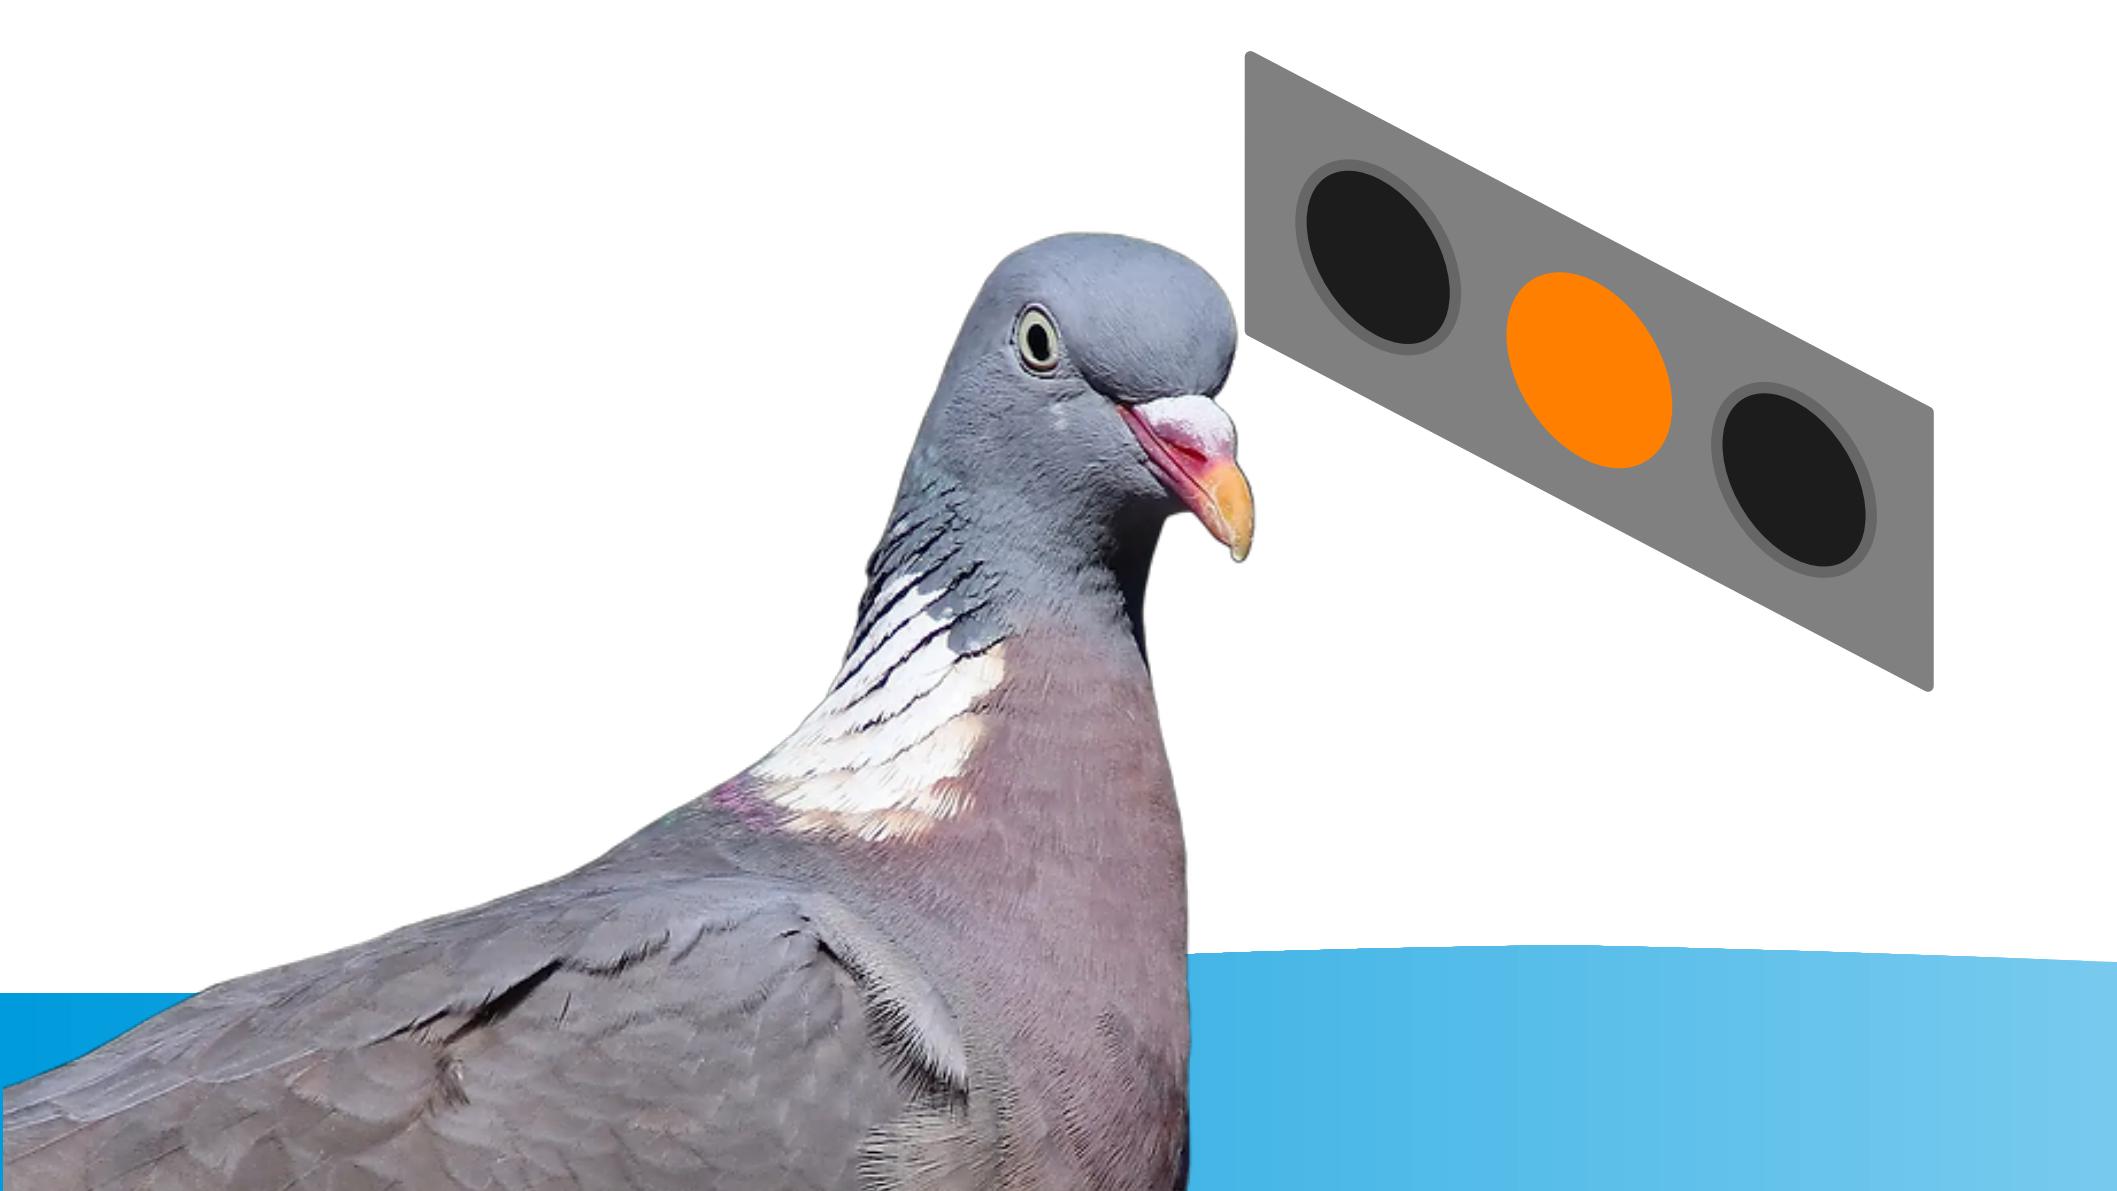

Las palomas, igual que las personas, parecen tener un límite en cuanto a la cantidad de información que pueden atender.

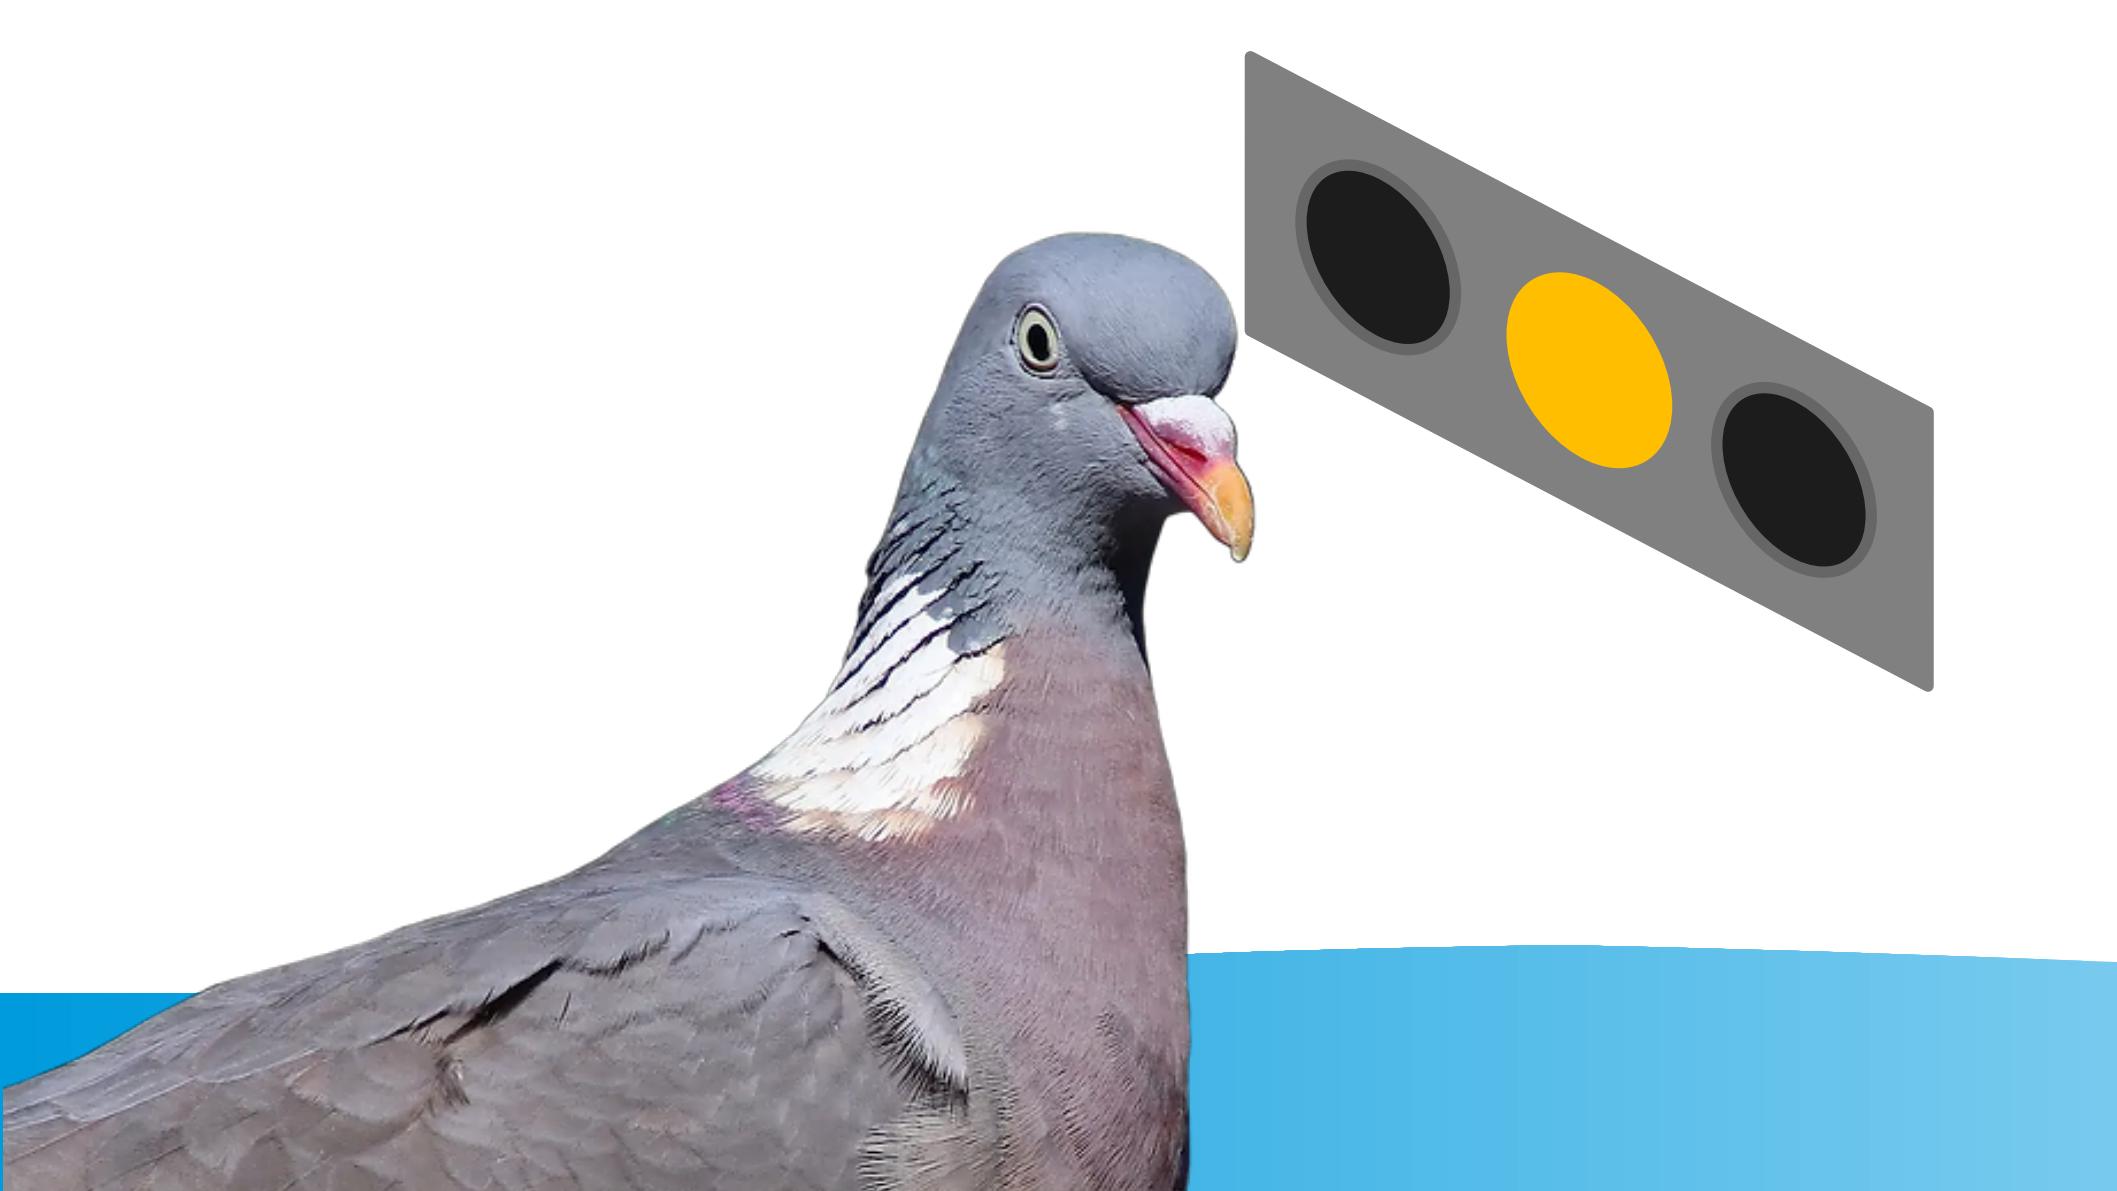

Las palomas, igual que las personas, parecen tener un límite en cuanto a la cantidad de información que pueden atender.

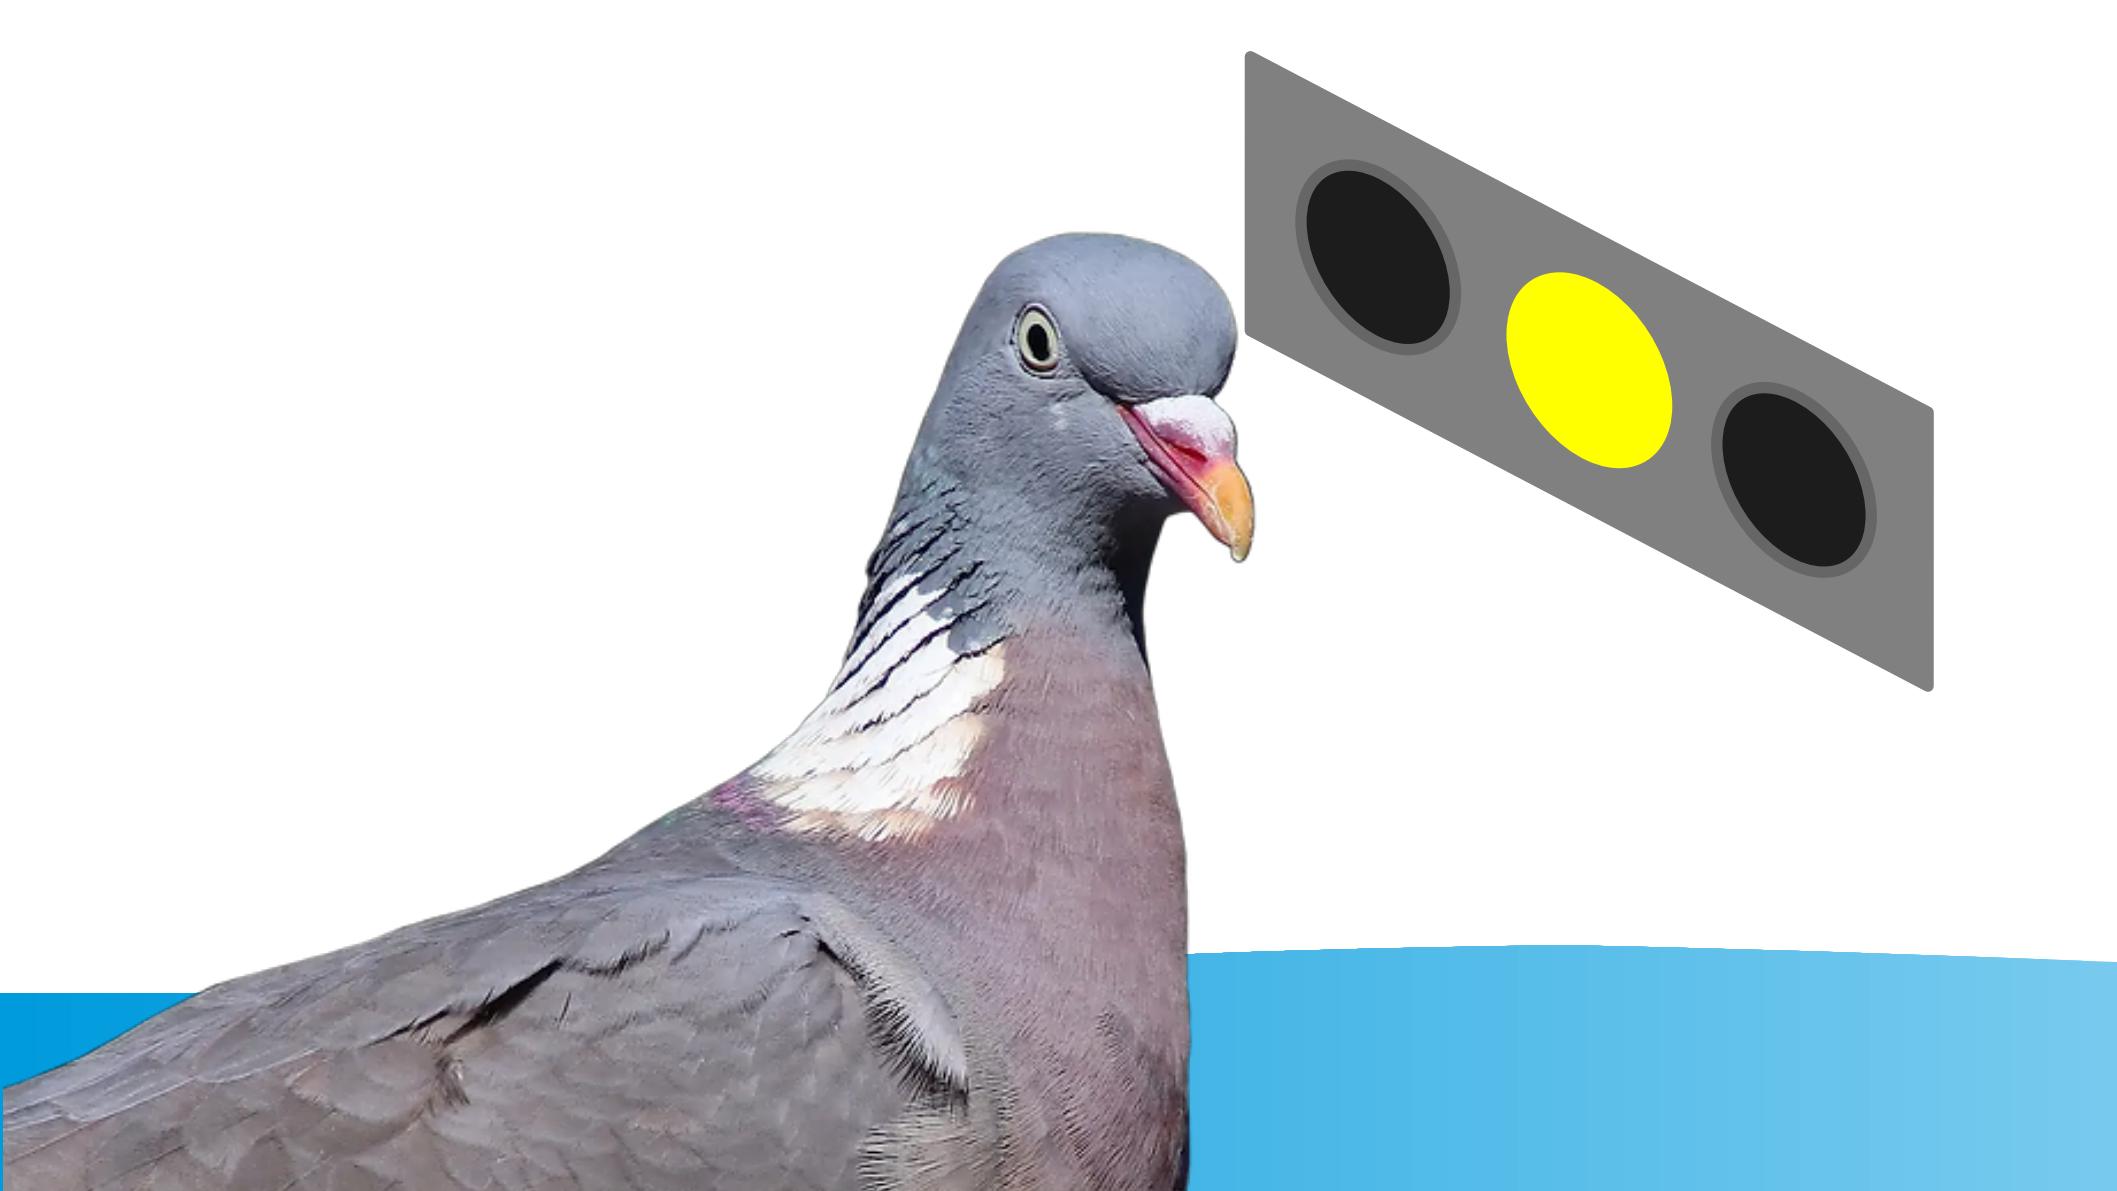

¿o no? D:

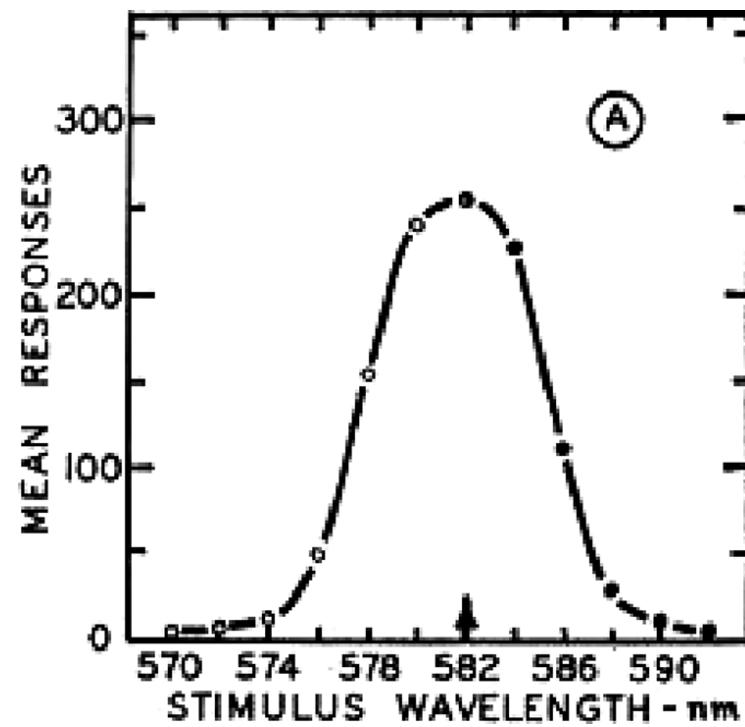

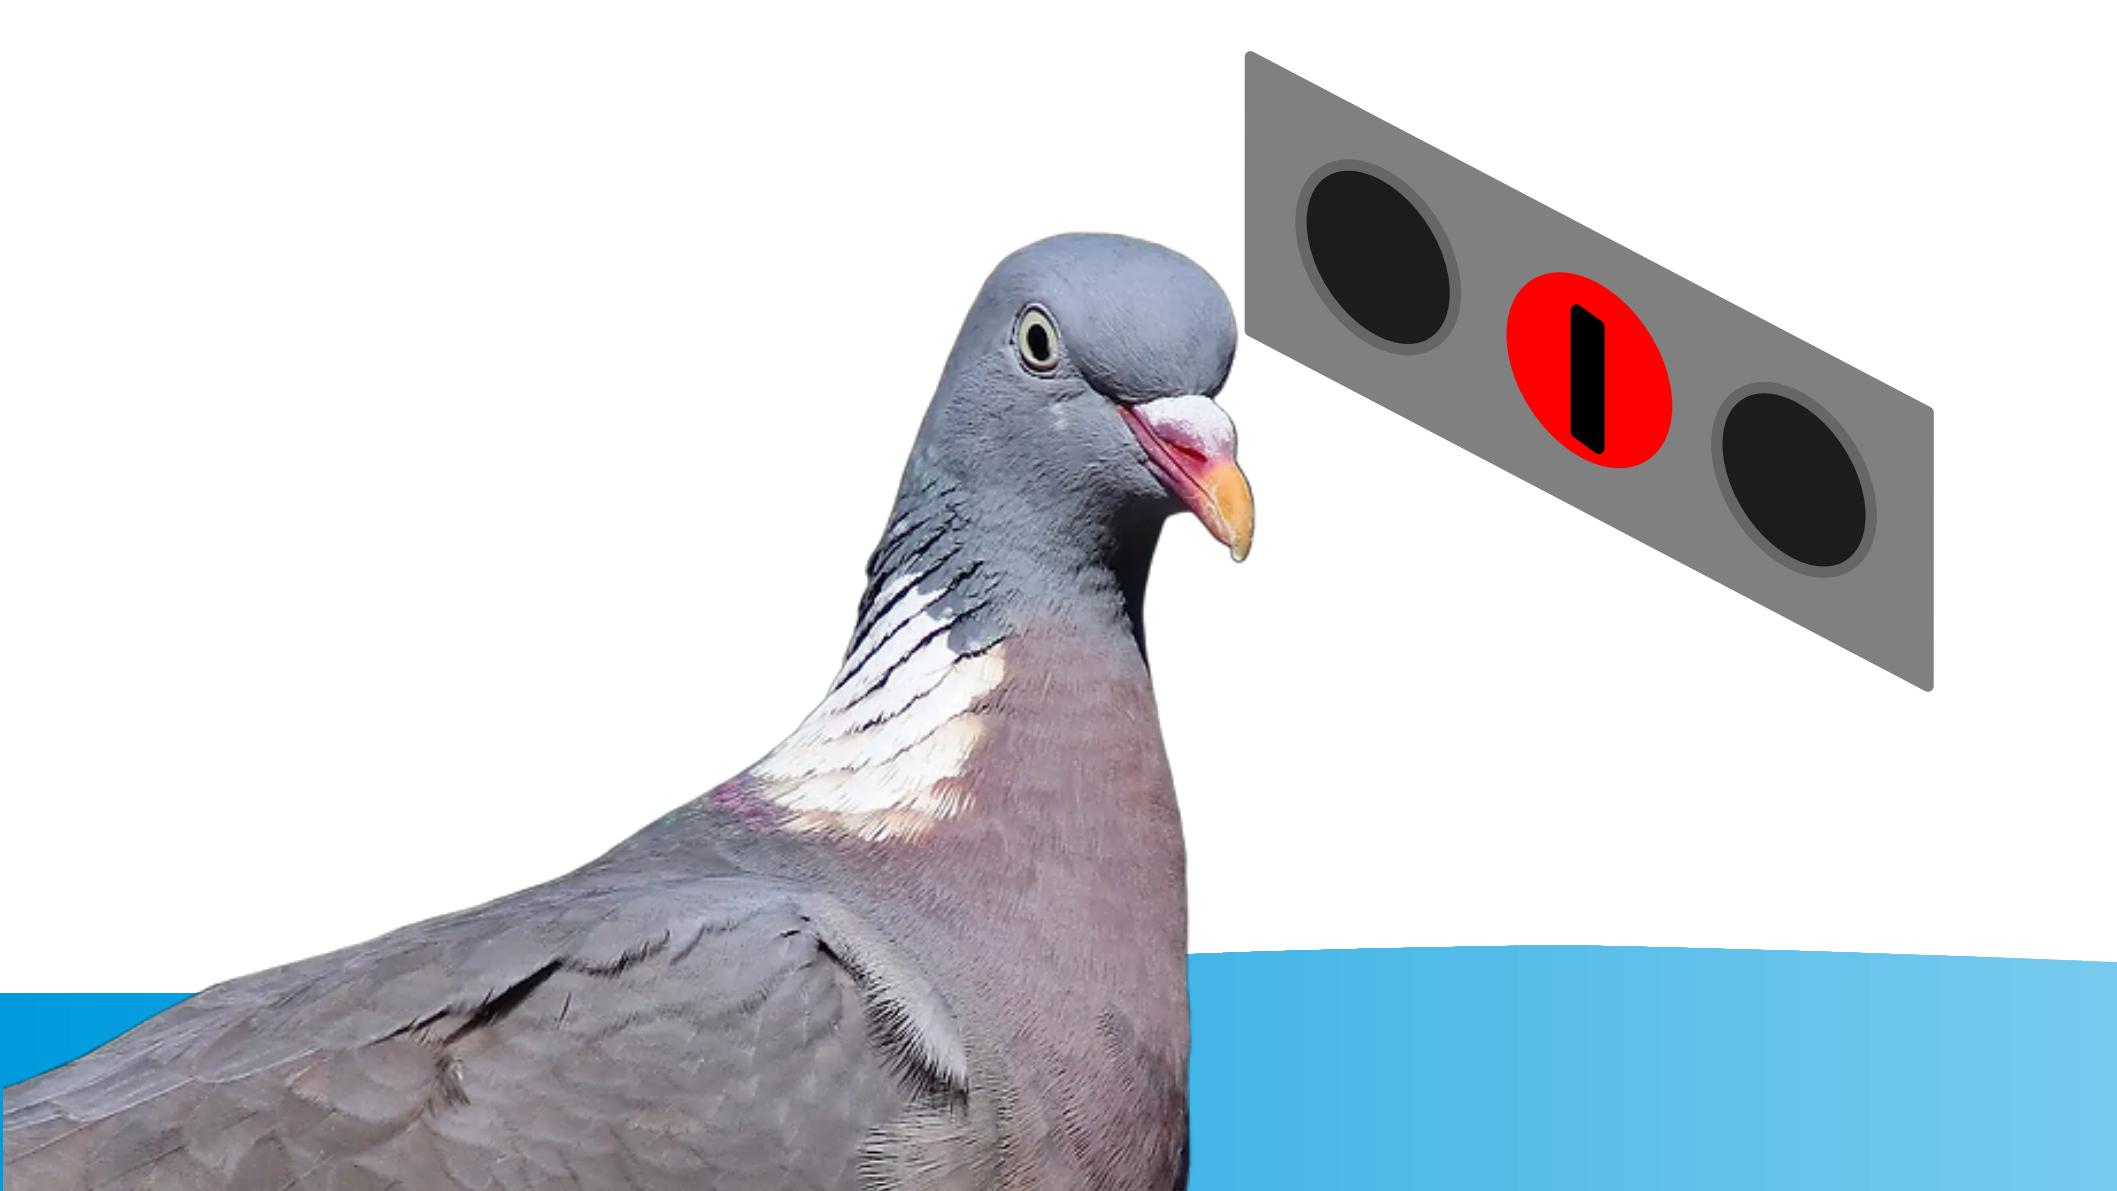

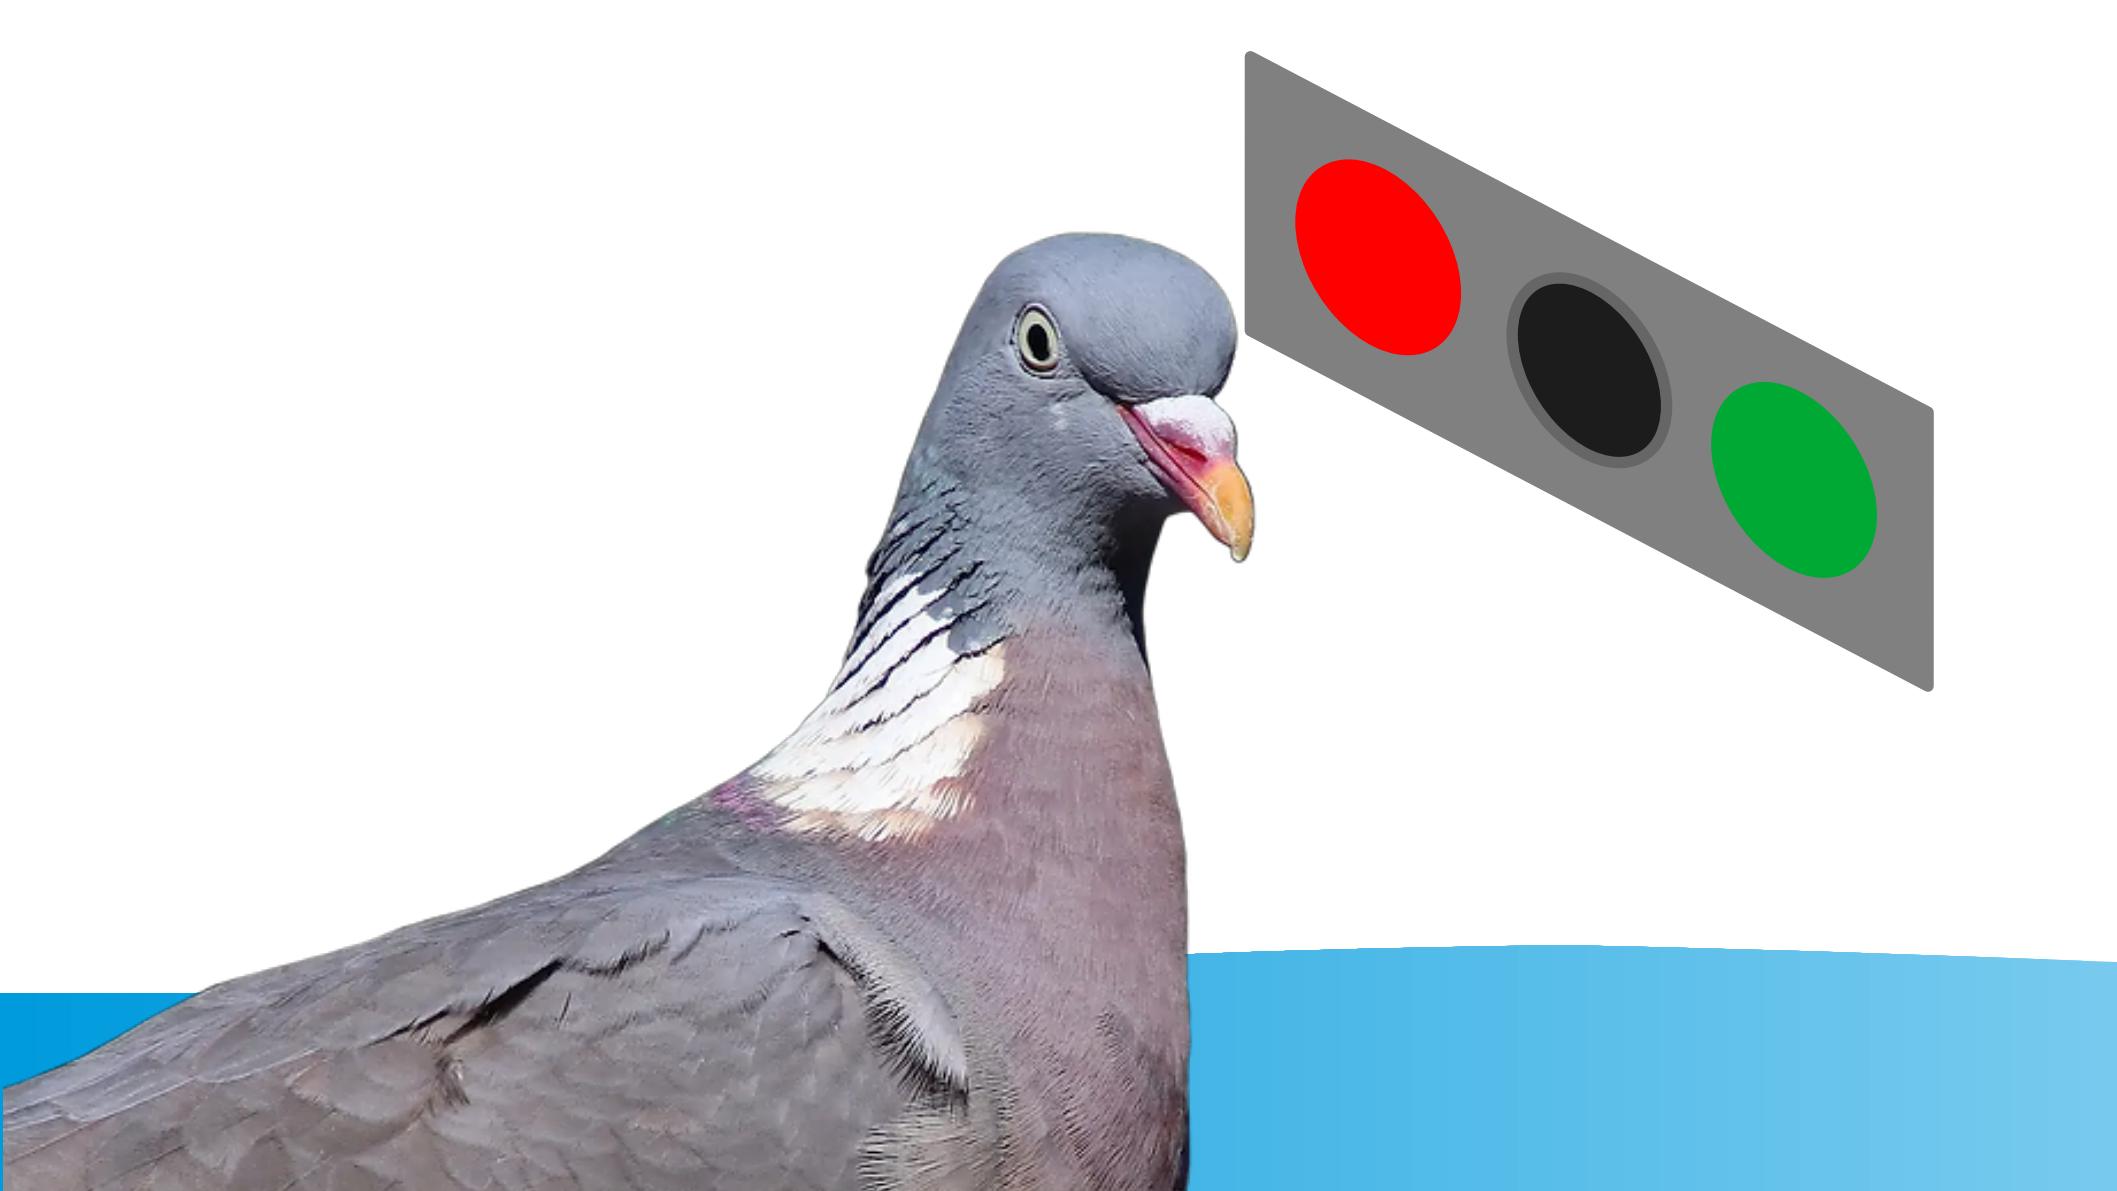

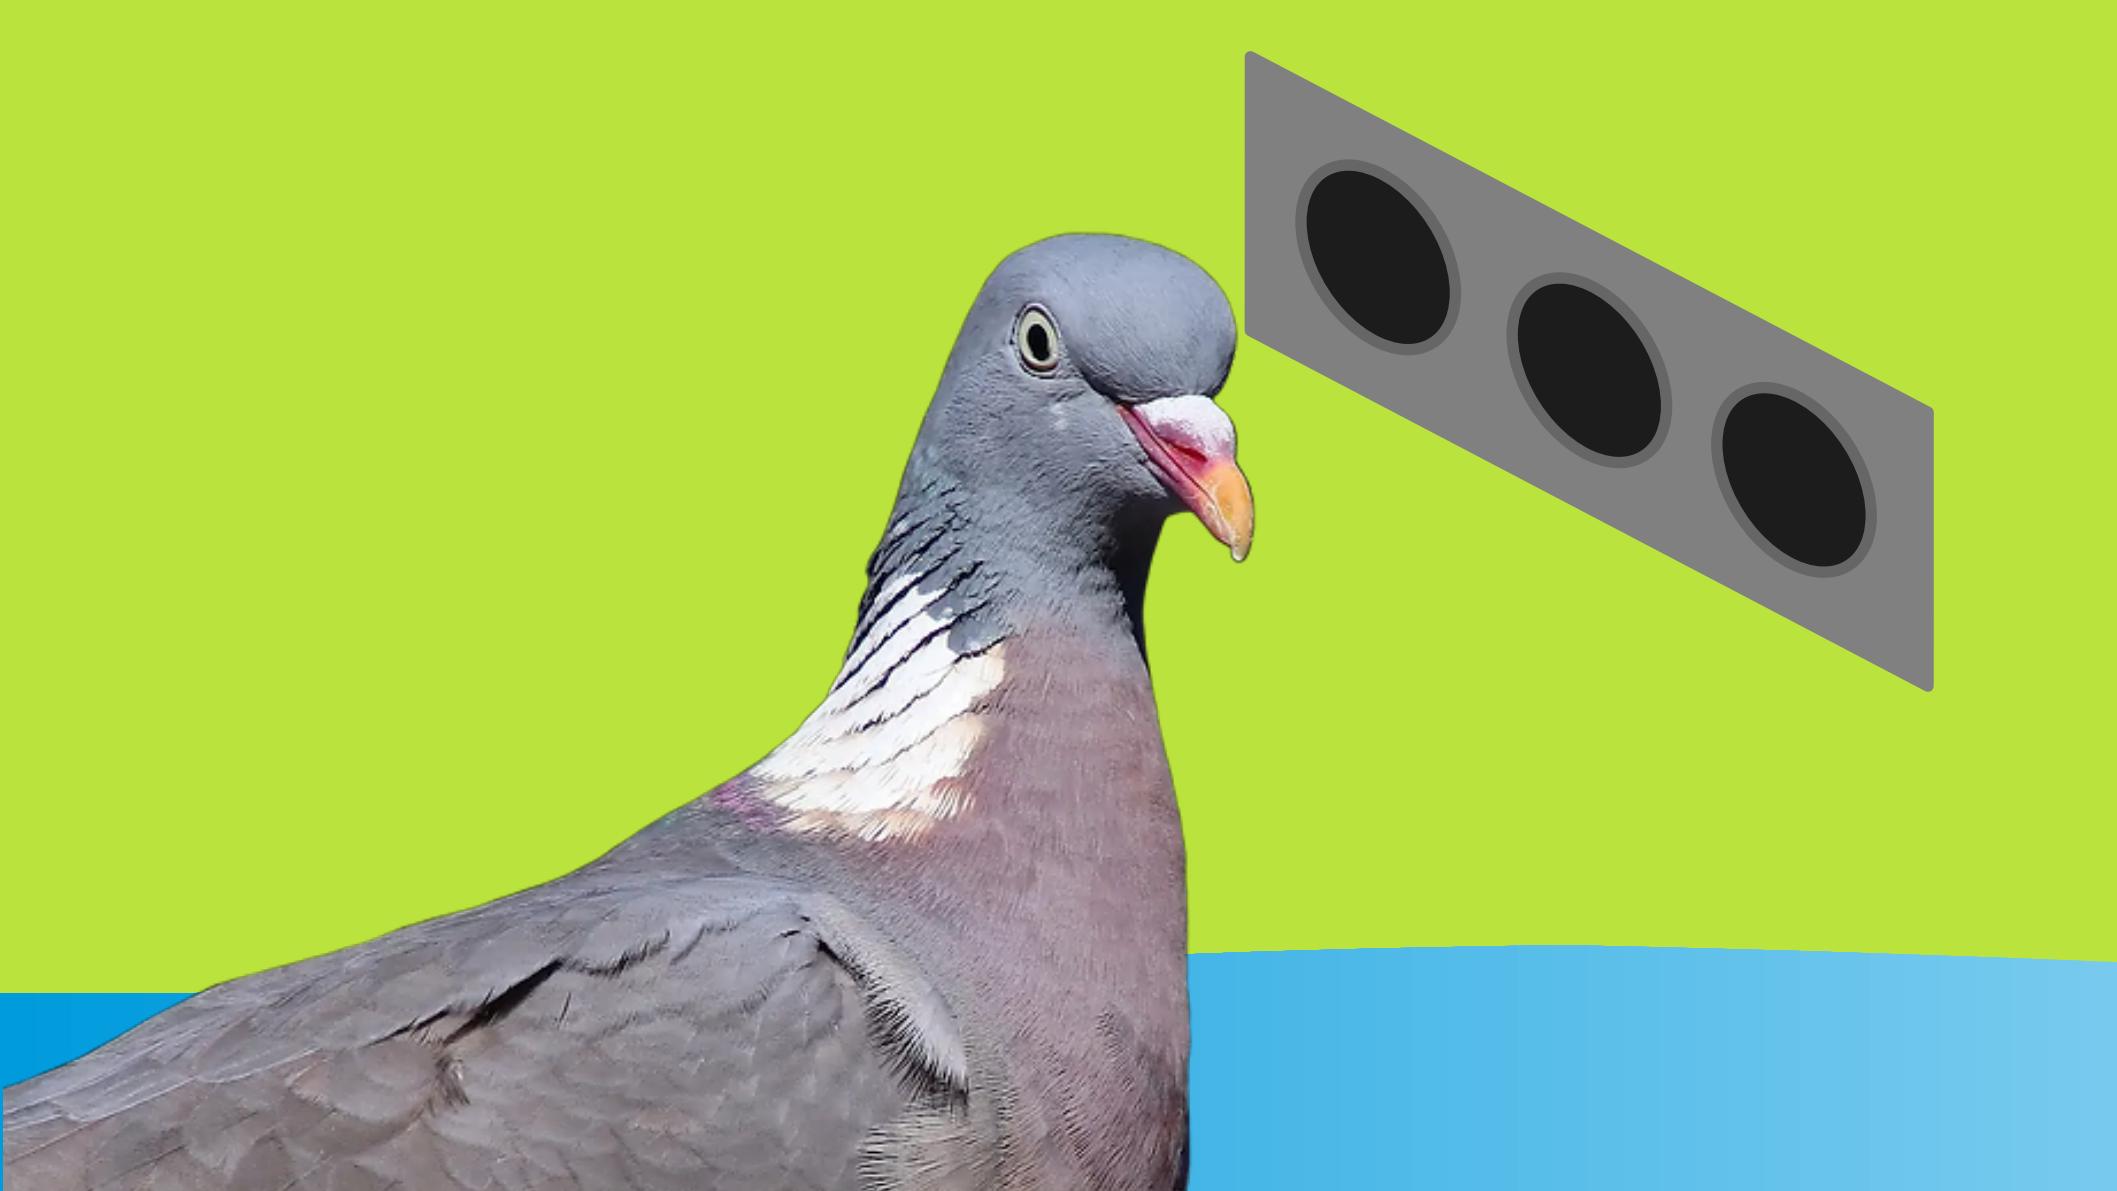

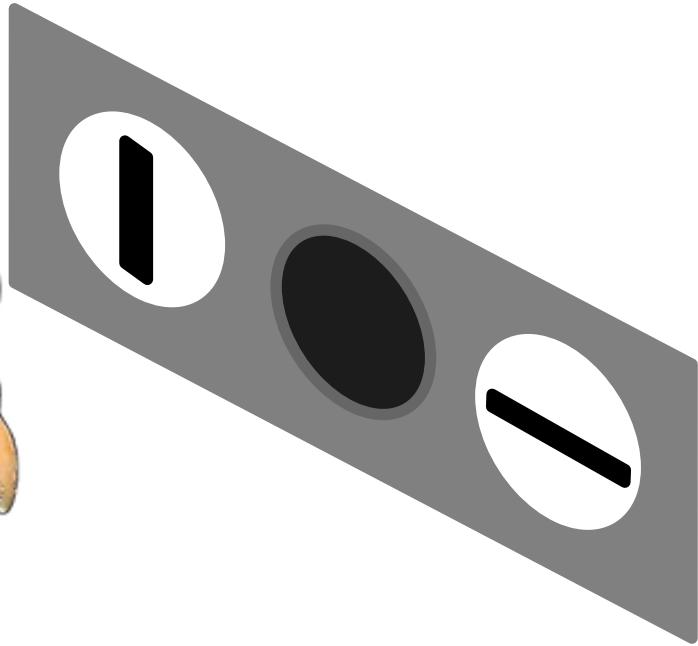

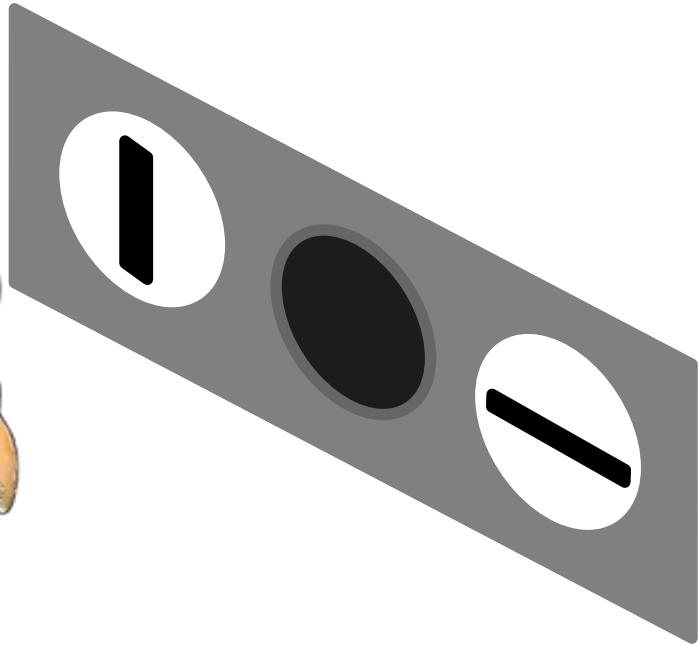

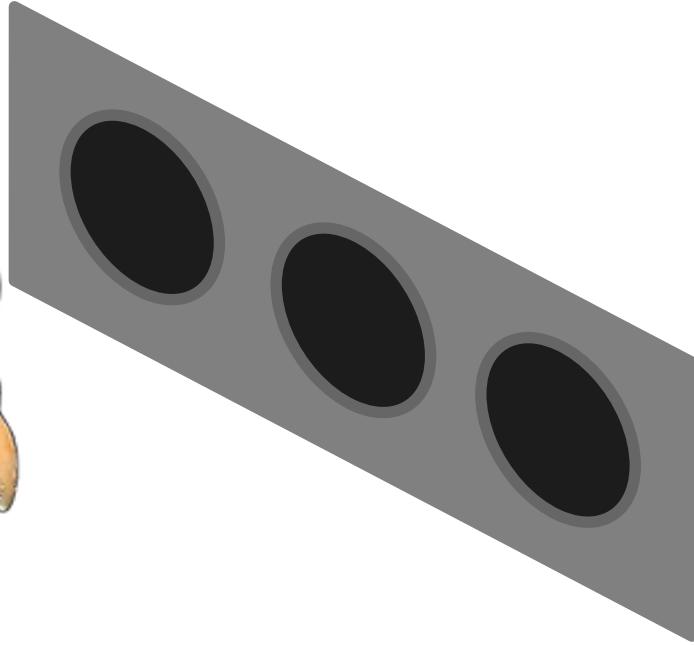

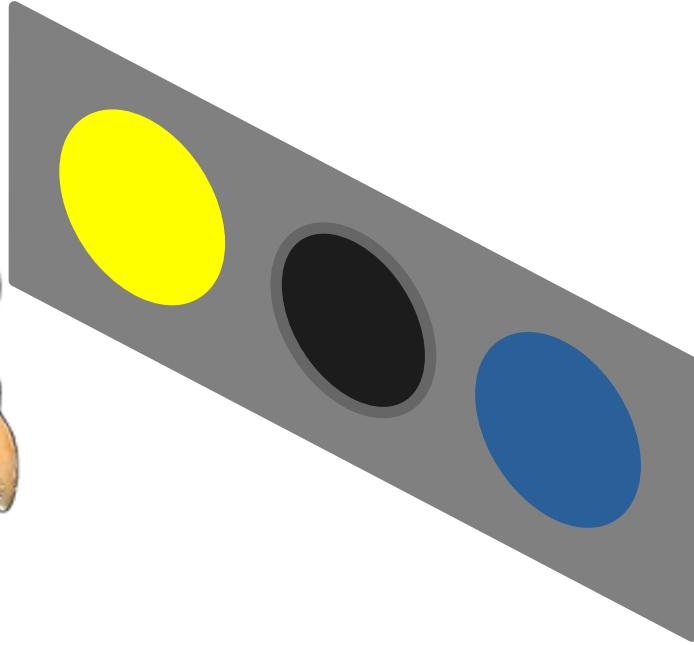

Éxito > 90%

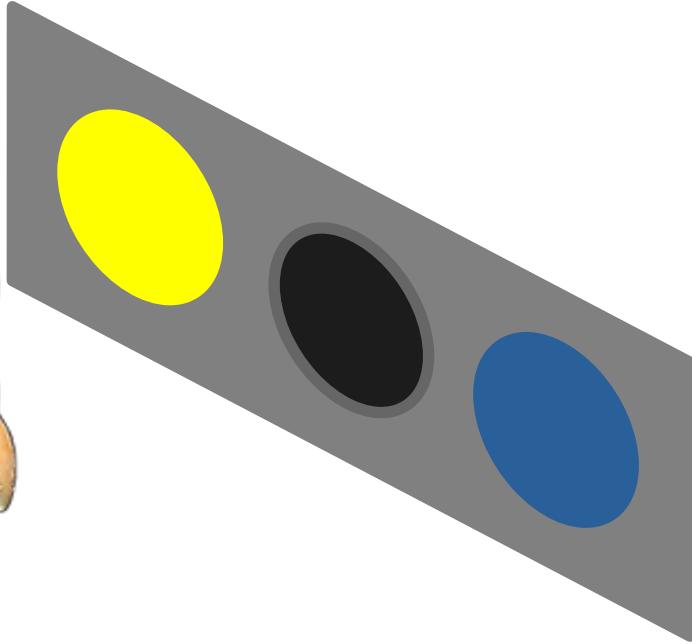

300Hz/3000Hz

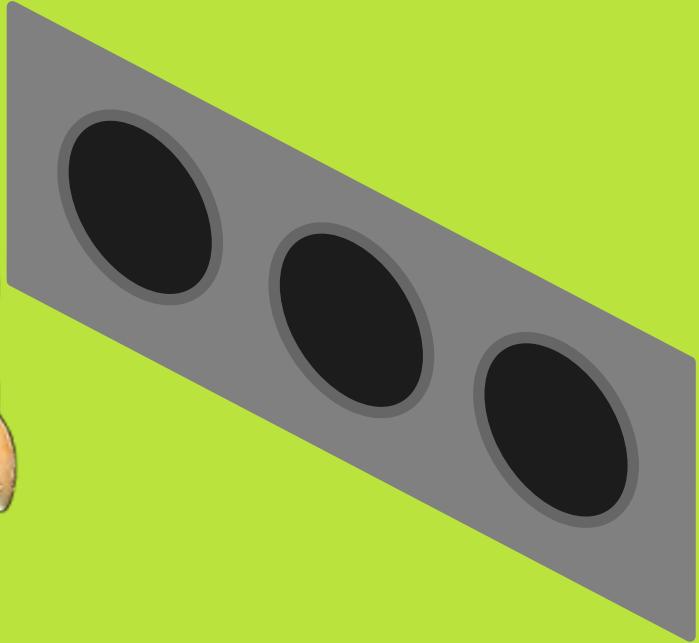

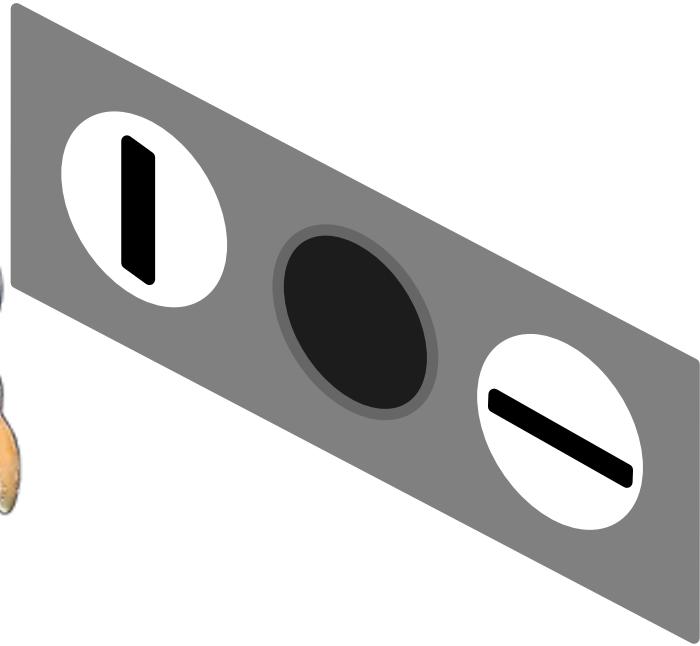

Éxito > 80%

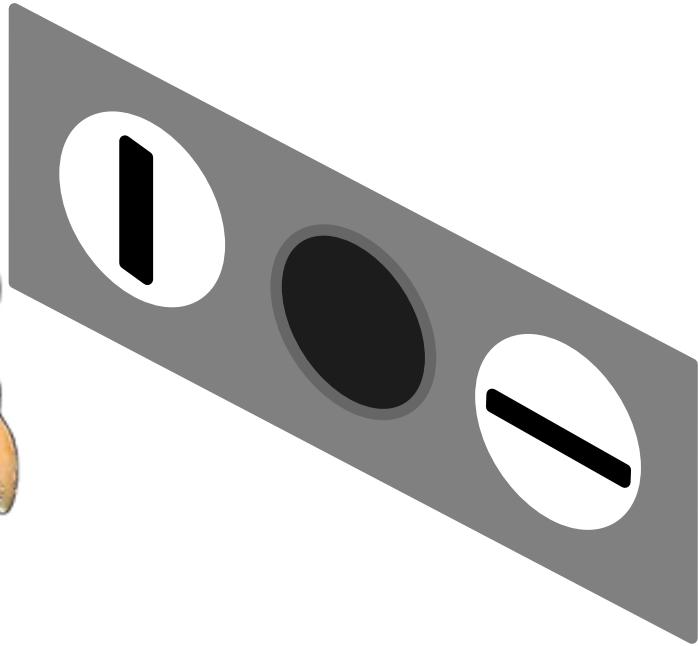

300Hz/3000Hz

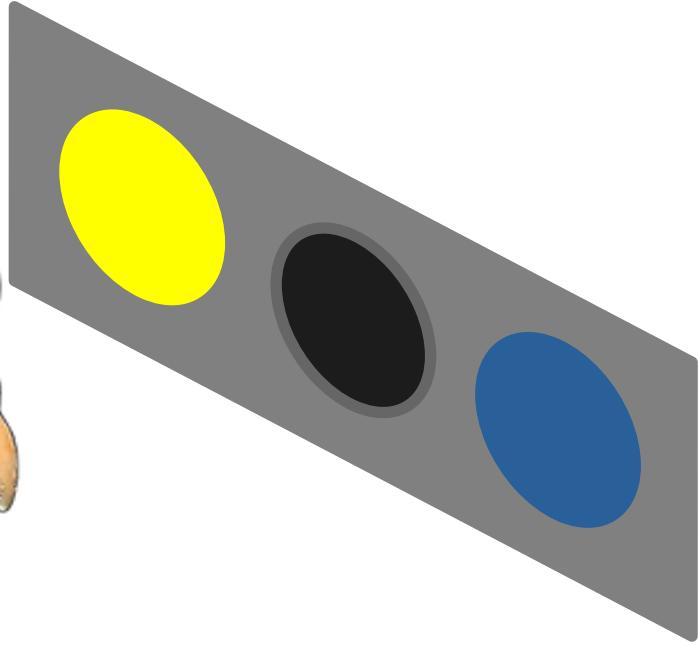

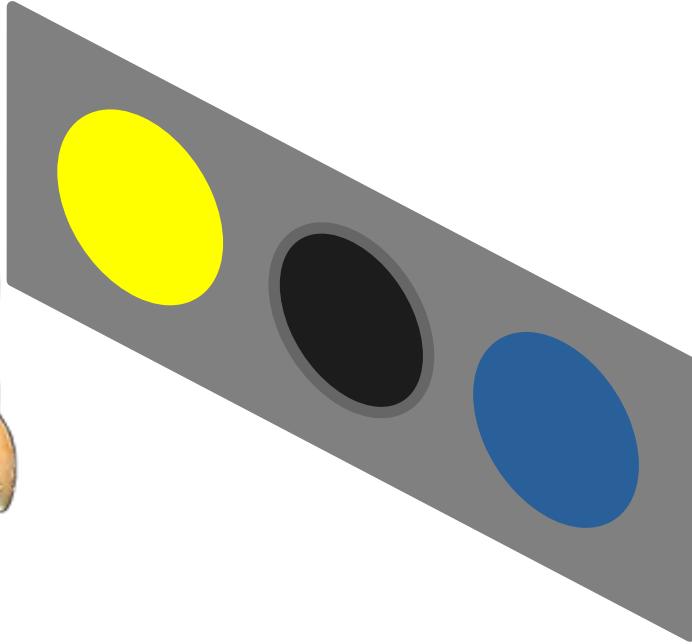

Éxito > 90%

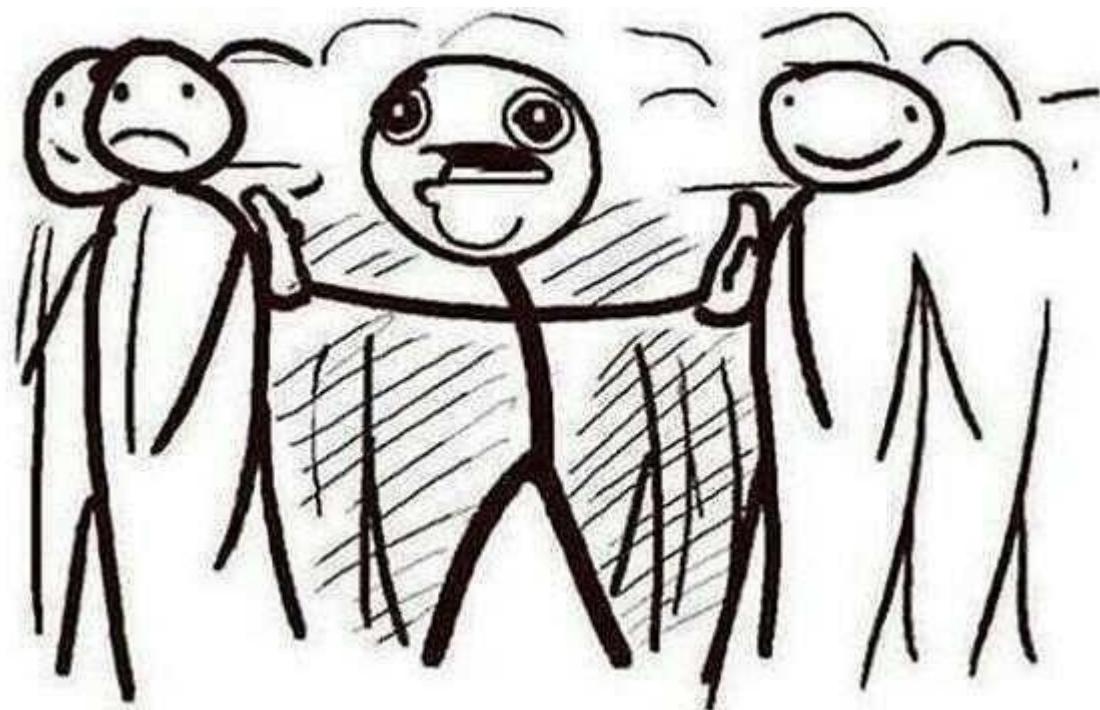

Éxito 50%
